## **Advanced Multitasking Do More Work Less Be Happy:**

**Advanced Multitasking** Michael Sanders, Michael Sanders Ma, 2014-01-05 Advanced Multitasking is a simple innovative work model that enables you to do more work less and be happy. Although multitasking has rightfully been labeled harmful, it is still considered a key skillset in today's fast-paced, ever-evolving workplace. But the truth is, multitasking does not exist. In his book, Michael Sanders shows how multitasking really works, what it does to you, and better and more satisfying ways to get the right things done. His model combines extensive research, experience, and proven results to form a highly effective work process. Michael's power tools enable you to perform at significantly higher levels using all four of your cognitive brains (yes, four). You need to function even more quickly and effectively to thrive in our global economy. Do more work less and be happy with Advanced Multitasking. *Advanced Multi-Project Management* Gerald I. Kendall, Kathleen M.

Austin, 2012-11-02 Even in a well-managed multi-project environment, it is not unusual to see half of all projects completed either late, over budget, or with cuts to original scope. However, the proven approach presented in *Advanced Multi-Project Management* has enabled large, medium, and even small organizations to consistently complete their projects faster within original scope and budget, and increase the number of projects executed with the same resources by as much as 70%. The list of companies that have used this methodology for stunning results includes some of the biggest, well-known names in the world: Boeing, Rio Tinto, ABB, and Chrysler. This guide details the six gears that must work in unison to drive speed and predictability within an organization.

**Foundation, Architecture, and Prototyping of Humanized AI** Mark Chang, 2023-07-31 Humanized AI (HAI) emerging as the next of the AI waves refers to artificial social beings that are very close to humans in various aspects. Beings who are machine race humans, not digital slaves. Foundation, Architecture, and Prototyping of HAI deploy a novel small-data approach to vertically explore the spectrum of HAI. Different from the popular big data philosophy that is based on the rigid notion that the connotation of each concept is fixed and the same to everyone, this book treats understanding as a process from simple to complex and uses the similarity principle to effectively deal with novelties. Combining the efficiency of the Behaviorists' goal-driven approach and the flexibility of the Constructivists' approach, both the architecture of HAI and the philosophical discussions arising from it are elaborated upon. Advancing a unique approach to the concept of HAI, this book appeals to professors and students of both AI and philosophy, as well as industry professionals looking to stay at the forefront of developments within the field.
