The British National Bibliography Arthur James Wells, 2001 **Amazon Slave** Lisette Ashton, 2005 Stranded alone and penniless in the heart of the Amazon Basin Emily thinks things can't get any worse. It is only when she meets the captain of the Amazon Maiden that her dark journey truly begins *Interdisciplinaries* Didi Herman, Connal Parsley, 2022-02-23 This book illuminates methodology in legal research by bringing together interdisciplinary scholars who employ a diverse set of methodologies to address a specific shared research challenge: the body. The contributors were asked a question: if you were invited to contribute to an edited book on the body, where would you start and then where would you go? The result is a self-reflective discussion of how and where researchers engage with methodological practices. The contributors draw on their own interdisciplinary research experiences to explore how the body might be addressed in their work and the resources they would deploy in order to carry out the task. This book, within a book, is innovative in both content and format. It provides a rare insight into how top interdisciplinary legal scholars go about making decisions about their research. The shared device of the body allows the volume to trace a number of rich approaches into the process of research as practiced by these diverse scholars. In presenting thinking and research in action, the volume offers a new self-reflective view on the much-addressed theme of the body as well as taking a fresh approach to the historically vexed problem of research methodology in legal studies *Shrimp and Prawn Welfare in the Wild-Caught Fishing Industry* Ren Ryba, Shannon M Davis, Tse Yip Fai, Peter Singer, 2025-09-26 At 37 trillion individuals per year, wild-caught shrimp and prawns appear to be the single most numerous group of animals directly killed for human food consumption on the planet. Recent scientific developments suggest that at least some species of shrimp are sentient beings, and should that be the case, there is a need for policies that could improve shrimp welfare. This book delves into the ethical implications of the probability that shrimp and prawns are capable of feeling pain and the welfare policies that could be adopted. It looks at global shrimp fisheries and their different animal welfare concerns, from the largest industrial trawlers in developed and developing countries to small-scale fisheries in developing countries. The authors provide a new dataset of the estimated numbers of individual shrimp caught by country and species, using this to describe the shrimp fishing industry in the world's top 30 countries by estimated catch. Examining recent developments in government and industry policy, the book suggests ways that policymakers could improve wild-caught shrimp welfare: from installing electrical stunning equipment in large-scale trawl fisheries to improving supply chain practices in small-scale fisheries. It provides a roadmap for future research and policy to address this urgent emerging challenge. This book's data visualisations and roadmap will empower researchers, NGOs, and policymakers to focus their efforts on the most impactful and evidence-based solutions for improving aquatic animal welfare *Abstracts of the Annual Meeting -- American Anthropological Association* American Anthropological Association, 2003 **Studies in the Literary Imagination**, 1988 **Bound to Serve** Amanda Ware, 1999 Caroline West agrees to become the slave of the manipulative
