Adams, Jim Craine, 2016-03-23 This Companion provides an authoritative source for scholars and students of the nascent field of media geography While it has deep roots in the wider discipline the consolidation of media geography has started only in the past decade with the creation of media geography's first dedicated journal *Aether* as well as the publication of the sub discipline's first textbook However at present there is no other work which provides a comprehensive overview and grounding By indicating the sub discipline's evolution and hinting at its future this volume not only serves to encapsulate what geographers have learned about media but also will help to set the agenda for expanding this type of interdisciplinary exploration The contributors leading scholars in this field including Stuart Aitken Deborah Dixon Derek McCormack Barney Warf and Matthew Zook not only review the existing literature within the remit of their chapters but also articulate arguments about where the future might take media geography scholarship The volume is not simply a collection of individual offerings but has afforded an opportunity to exchange ideas about media geography with contributors making connections between chapters and developing common themes [Dressage for the Not-So-Perfect Horse](#) Janet Foy, 2012-07-10 A 5 dressage judge's practical ways to learn to love your horse's idiosyncrasies and turn weaknesses into

Between the Black Box and the White Cube Andrew V. Uroskie,2014-02-27 Today the moving image is ubiquitous in global contemporary art The first book to tell the story of the postwar expanded cinema that inspired this omnipresence *Between the Black Box and the White Cube* travels back to the 1950s and 1960s when the rise of television caused movie theaters to lose their monopoly over the moving image leading cinema to be installed directly alongside other forms of modern art Explaining that the postwar expanded cinema was a response to both developments Andrew V Uroskie argues that rather than a formal or technological innovation the key change for artists involved a displacement of the moving image from the familiarity of the cinematic theater to original spaces and contexts He shows how newly available inexpensive film and video technology enabled artists such as Nam June Paik Robert Whitman Stan VanDerBeek Robert Breer and especially Andy Warhol to become filmmakers Through their efforts to explore a fresh way of experiencing the moving image these artists sought to reimagine the nature and possibilities of art in a post cinematic age and helped to develop a novel space between the black box of the movie theater and the white cube of the art gallery Packed with over one hundred illustrations *Between the Black Box and the White Cube* is a compelling look at a seminal moment in the cultural life of the moving image and its emergence in contemporary art
