**Using Free Scribus Software to Create Professional Presentations: Book Covers, Magazine Covers, Graphic Designs, Posters, Newsletters, Renderings, and** Alice Chen, Gang Chen, 2010-12-12 About 80% of people have the desire to write a book at some point. With the advance of computer and printing technology, this dream can become a reality. One important factor of publishing a book is to create a professional looking book cover. This book uses book cover design as a case study to teach you how to use FREE Scribus software instead of expensive professional software like InDesign, Photoshop and QuarkXpress to create professional presentations. With fewer words and many full color screenshots, we walk you step by step through the entire process. No prior experience is needed. You will learn how to: 1. Download all the FREE software needed. 2. Put the cover template in correct formats. 3. Set up the sheet correctly using units, colors (RGB or CMYK), layers, the imported cover template sizes, guides, bleed area and safety margin. 4. Add the background color for the cover with a shape or image frame. 5. Add the cover image and author's photo, as well as how to handle a fully bleed image. 6. Add the titles and text accurately, including information on selecting or changing the text color using the text box, centering the text, aligning different text boxes and rotating the text. 7. Add the barcode by extracting the barcode from an EPS file and moving all the barcode elements together, or by adding the barcode as a JPEG image file. 8. Use Scribus software to create professional presentations such as book covers, magazine covers, graphic designs, posters, newsletters, renderings and more.
