

HISEC SECURITY MANAGEMENT SOFTWARE

The ThorGuard Management Software is a unique and flexible management platform encompassing Alarm Monitoring, Access Control & Intrusion Management and an advanced configuration platform. This sophisticated system offers the ultimate in flexibility and system design, providing a seamless security management package designed to meet the demands of today's security professionals. The ThorGuard Management Software (TGM5) can be installed on a single PC, or distributed across several machines all connected simultaneously to the installed systems via a TCP/IP network.

FUNCTIONALITY

ThorGuard Management Software offers the flexibility to meet all site requirements, managing a virtually unlimited number of installed HISEC Intrusion and Access Control Systems via serial, modem or TCP/IP connections. The platform design is similar to Windows Explorer providing a familiar, easy to navigate layout.

OPERATORS

Each operator is granted access to the system according to their unique operator profile, which determines their log-in rules, language selection, access rights and access level. The system administrator is able to grant access at a high level, allowing users limited access rights where required. A full audit trail is continually maintained for all operator transactions.

ACCESS IMAGE RECOGNITION (AIR)

AIR is a standard feature of TGM5 which enables an operator to manually grant or deny access to specified cardholders at specified card readers at specified times and days. Depending on whether the cardholder's stored image matches a live image from a camera near the card reader, the operator may grant or deny access, and display a pre-defined message on the relevant terminal.

VIDEO INTEGRATION

ThorGuard Management Software is fully compatible with the market leading Symmetry™ Video Management Software for remote video verification of alarms and events. The Symmetry Video Management software communicates with TGM5 with all alarms and events visible through the Symmetry interface. Alarms can also be viewed, silenced and reset using either Symmetry or the TGM5.
