“*Worship*” means good works. “*He who serves* (which means to do good) *the world* (*the creation*) *is blessed*” (Matthew 25:46). This was probably the primary meaning of the original New Testament word. Pauline Christians were always considered “blessed” because their works and their lives were always “*for the sake of others*” (Romans 15:2). Paul’s words in 1 Thessalonians 5:12-13 are typical: “*For ye are the *body* of Christ, and the members *are the parts* of Christ. And we beseech you, brethren, that ye *warn* them which *walk* disorderly, and *not* *according* to the *tradition* *which* *ye* *have* *received*, *that* *ye* *keep* *the* *scriptures* *of* *the* *Lord*” (italics added).*

The most recent and most prominent group, which has been established in the United States, and which has adopted a policy of non-resistance, is the Society of Friends, or Quakers, which was founded in 1650, and which, notwithstanding the persecutions to which it has been subjected, has increased in numbers and influence, and now numbers over 100,000 members, and is to be found in every state of the Union, and in many foreign countries. The Society of Friends, or Quakers, is a religious body, and is not a political party, but it has, nevertheless, been instrumental in the promotion of many important measures, such as the abolition of slavery, the prohibition of alcohol, and the promotion of peace, and has been a powerful factor in the development of the United States.

Designing Learning with Digital Play Fei Victor Lim, Weimin Toh, 2025-12-15 Lim and Toh provide updates on recent research on digital play and learning and unite game based learning with multimodal and social semiotic theories. They adopt the position that teachers or caregivers scaffolding is required when games are used in a pedagogical context such as the classroom. The book offers a nuanced view of the nature and properties of games beyond motivation including the students interest and use of digital play. The chapters explore the varied ways in which games are designed to promote critical thinking and reflection. It expands on the teachers or caregivers scaffolding of students digital play in pedagogical contexts such as in a classroom setting where students are guided to reflect on how they perceive the representations in the game world. With this openness and interest towards digital play the authors argue that it is timely for us to examine the value of digital play for learning that it can foster literacy development as well as promote growth in the affective domain. They echo the call for design principles in digital play to inform the design of students learning experiences and explore ways in which digital play can be integrated into teaching and learning. This book covers a topic which is both relevant and urgent in today's digital age. Of interest to anyone involved in designing learning with digital play this volume will be of particular value to students and scholars in education curriculum design pedagogy as well as multimodality.
