weather what the greenhouse effect and the ozone hole are what Noah's flood and the Ice Age have in common how  
 weatherpersons forecast hurricanes and tornadoes how to read a weather map and what our responsibility is to the  
 environment Learning about the weather is fun It will change the way you look at the clouds in the sky Now you'll have more  
 of an understanding about what is going on miles above your head And when you hear a weather report on television you will  
 understand so much more about the world around you Semester 2 Astronomy One thing we have in common with the  
 ancients is that all of the human race has gazed at the night sky and the bright morning and wondered What's out there Our  
 universe is so vast and awe inspiring that to learn about it is to learn about ourselves The Astronomy Book will teach you  
 what long ago astronomers thought about other worlds solar system facts how constellations relate to astrology the history of  
 space exploration black holes do they exist the origin and age of the moon why Mars doesn't support life the composition of  
 stars supernova remnants and the myth of star birth asteroid legends and the extinction of the dinosaurs are there planets  
 outside our solar system and could they be home to intelligent life what are UFOs and the age of comets and meteor showers  
 Learning about the universe is huge fun In the almost infinite expanse above us we can examine planets galaxies and  
 phenomena so beautiful and complex that we never outgrow a childlike wonder We see our own reflection in the moon the  
 stars and in comet trails The more we learn the less we fear      **Meteorology I** Victor F. Morris, Embry-Riddle Aeronautical
