**From Chanson de Geste to Epic Chronicle** Gérard Gouiran, 2020-03-25 In this collection of essays Gérard Gouiran one of the world's leading and much loved scholars of medieval Occitan literature examines this literature from a primarily historical perspective Through texts offering hitherto unexplored insights into the history and culture of medieval Europe he studies topics such as the representation of alterity through female figures and Saracens in opposition to the ideal of the Christian knight the ways in which the narrating of history can become resistance and propaganda discourse in the clash between the Catholic Church and the French on the one hand and the Cathar heretics and the people of Occitania on the other questions of intertextuality and intercultural relations cultural representations fashioning the West in contact with the East and Christian dissidence in the twelfth and thirteenth centuries Written in an approachable style the book will be of historical literary and philological interest to scholars and students as well as any reader curious about this hitherto little known Occitan literature CS1087

*The Privatization of Space Exploration* Lewis D. Solomon, 2017-09-08 Space was at the center of America's imagination in the 1960s President John F Kennedy's visionary statement captured the mood of the day We choose to go to the moon in this decade and do the other things not because they are easy but because they are hard The Apollo mission's success in July 1969 made almost anything seem possible but the Cold War made space flight the province of governmental agencies in the United States When the Apollo program ended in 1972 space lost its hold on the public interest as the great achievements wound down Entrepreneurs are beginning to pick up the slack looking for safer more reliable and more cost effective ways of exploring space Entrepreneurial activity may make create a renaissance in human spaceflight The private sector can energize the quest for space exploration and shape the race for the final frontier

Space entrepreneurs and private sector firms are making significant innovations in space travel They have plans for future tourism in space and safer shuttles Solomon details current US and international laws dealing with space use settlement and exploration and offers policy recommendations to facilitate privatization As private enterprise takes hold it threatens to change the space landscape forever Individuals are designing spacecraft start up companies are testing prototypes and reservations are being taken for suborbital space flights With for profit enterprises carving out a new realm it is entirely possible that space will one day be a sea of hotels and or a repository of resources for big business It is important that regulations are in place for this eventuality These new developments have great importance huge implications and urgency for everyone
