**Signal and Information Processing, Networking and Computers** Yue Wang, Yuyang Liu, Jiaqi Zou, Mengyao Huo, 2023-02-23 This book collects selected papers from the 10th Conference on Signal and Information Processing Networking and Computers held in Xi Ning China held in July 2022 The book focuses on the current works of information theory communication system computer science aerospace technologies and big data and other related technologies People from both academia and industry of this field can contribute and find their interests from the book Encyclopedia of Operations Research and Management Science Saul I. Gass, Carl M. Harris, 2001 Audience Anyone concerned with the science techniques and ideas of how decisions are made BOOK JACKET **Airline, Ship & Catering Onboard Services Magazine**, 1997-02 **The Design of Aircraft Landing Gear** Robert Kyle Schmidt, 2021-02-18 The aircraft landing gear and its associated systems represent a compelling design challenge simultaneously a system a structure and a machine it supports the aircraft on the ground absorbs landing and braking energy permits maneuvering and retracts to minimize aircraft drag Yet as it is not required during flight it also represents dead weight and significant effort must be made to minimize its total mass The Design of Aircraft Landing Gear written by R Kyle Schmidt PE B A Sc Mechanical Engineering M Sc Safety and Aircraft Accident Investigation Chairman of the SAE A 5 Committee on Aircraft Landing Gear is designed to guide the reader through the key principles of landing system design and to provide additional references when available Many problems which must be confronted have already been addressed by others in the past but the information is not known or shared leading to the observation that there are few new problems but many new people The Design of Aircraft Landing Gear is intended to share much of the existing information and provide avenues for further exploration The design of an aircraft and its associated systems including the landing system involves iterative loops as the impact of each modification to a system or component is evaluated against the whole It is rare to find that the lightest possible landing gear represents the best solution for the aircraft the lightest landing gear may require attachment structures which don't exist and which would require significant weight and compromise on the part of the airframe structure design With those requirements and compromises in mind The Design of Aircraft Landing Gear starts with the study of airfield compatibility aircraft stability on the ground the correct choice of tires followed by discussion of brakes wheels and brake control systems Various landing gear architectures are investigated together with the details of shock absorber designs Retraction kinematics and mechanisms are studied as well as possible actuation approaches Detailed information on the various hydraulic and electric services commonly found on aircraft and system elements such as dressings lighting and steering are also reviewed Detail design points the process of analysis and a review of the relevant requirements and regulations round out the book content The Design of Aircraft Landing Gear is a landmark work in the industry and a must read for any engineer interested in updating specific skills and students preparing for an exciting career *Handbook of Human Factors and Ergonomics*

Gavriel Salvendy,1997-05-12 In orchestrating this book Dr Salvendy invited contributions from more than 100 of the foremost authorities around the world Each of its 60 chapters was reviewed by an international advisory panel comprised of some of today s leading figures in human factors and ergonomics While each chapter establishes the theoretical and empirical foundations of the subject under discussion the book s approach is primarily applications oriented Hence throughout readers will find case studies examples figures and tables that optimize the usability of the material presented It is an indispensable tool for human factors and ergonomics specialists safety and industrial hygiene professionals and engineers human resource professionals and managers in manufacturing and service industries and for educational institutions and government
