**Designing and Producing Media-Based Training** Steve Cartwright, G Phillip Cartwright, 2012-07-26 Training and informational programming has always been an important application of video and is one of the most important applications for multimedia. The use of technology in training for industry, government, health care, and education has increased dramatically in recent years. Video, text, graphics, animation, and sound are combined in various ways to convey concept, attitude, and technical skill. Designing and Producing Media Based Training examines why, how, and when you can use technology for training and describes successful approaches to creating effective technology based training. It describes the instructional design process, scriptwriting, multimedia authoring, media production, and new technology based training delivery systems. Among the many topics covered are training delivery trends, the training design process, defining the audience, reproduction, program design, and production design, scripting, and storyboarding, uses of light and color. Written by a highly experienced training consultant, Designing and Producing Media Based Training will provide training professionals, corporate managers, multimedia designers and producers, and videomakers with tools for designing effective technology based training programs.

**Response to Intervention** James P. Clark, Michelle Alvarez, 2010-03-31 Response to Intervention (RtI) is at the heart of evidence based practice in schools. Though written into federal special education legislation, it is a general education process consisting of a three tiered framework for organizing a comprehensive and differentiated system designed to ensure educational success for all students. The focus in this book is on meeting the social, emotional, and behavioral needs of students. School social workers are key stakeholders who need to be skilled in designing, monitoring, and evaluating the effectiveness of school wide universal supports, targeted group interventions, and intensive individual interventions in objective and measurable terms. Designed as both a training manual and a practical reference with contributions by seasoned academics and practitioners with extensive experience developing and practicing in RtI systems, this one of a kind guide operationalizes this crucial service delivery framework. It highlights the importance of data based decision making and offers concrete guidelines for collecting, analyzing, and displaying data. Detailed case examples that illustrate real world program implementation, practical guidance in selecting empirically supported practices, sample assessment worksheets, and strategies for supporting the adoption and sustainability of RtI systems make this a handy tool for school social workers seeking a more active role in using decision making processes to improve their school's system of support for all students.
