**Business and Social Crisis in Africa** Antoinette Handley, 2019-11-21 Based on fieldwork in four African countries this study reveals how African businesses can be key responders to wider social and political crises *Mobility and Migration Choices* Martin van der Velde, Ton van Naerssen, 2016-03-03 The crossing of national state borders is one of the most discussed issues of contemporary times and it poses many challenges for individual and collective identities This concerns both short distance mobility as well as long distance migration Choosing to move or not across international borders is a complex decision involving both cognitive and emotional processes This book tests the approach that three crucial thresholds need to be crossed before mobility occurs the individual's mindset about migrating the choice of destination and perception of crossing borders to that location and the specific routes and spatial trajectories available to get there Thus both borders and trajectories can act as thresholds to spatial moves The threshold approach with its focus on processes affecting whether when and where to move aims to understand the decision making process in all its dimensions in the hope that this will lead to a better understanding of the ways migrants conceive perceive and undertake their transnational journeys This book examines the three constitutive parts discerned in the cross border mobility decision making process people borders and trajectories and their interrelationships Illustrated by a global range of case studies it demonstrates that the relation between the three is not fixed but flexible and that decision making contains aspects of belonging instability security and volatility affecting their mobility or immobility

*Prisoners of the Past* Steven Friedman, 2021-06-01 Building on the work of economic historian Douglass North and Ugandan political scholar Mahmood Mamdani Friedman argues that the difficulties besetting South African democracy are legacies of the past not products of the post 1994 era South Africa's democracy is often seen as a story of bright beginnings gone astray a pattern said to be common to Africa The negotiated settlement of 1994 it is claimed ended racial domination and created the foundation for a prosperous democracy but greedy politicians betrayed the promise of a new society In *Prisoners of the Past* Steven Friedman astutely argues that this misreads the nature of contemporary South Africa Building on the work of the economic historian Douglass North and the political thinker Mahmood Mamdani Friedman shows that South African democracy's difficulties are legacies of the pre 1994 past The settlement which ushered in majority rule left intact core features of the apartheid economy and society The economy continues to exclude millions from its benefits while racial hierarchies have proved stubborn apartheid is discredited but the values of the pre 1948 colonial era the period of British colonization still dominate Thus South Africa's democracy supports free elections civil liberties and the rule of law but also continues past patterns of exclusion and domination Friedman reasons that this path dependence is not as is often claimed the result of constitutional compromises in 1994 that left domination untouched This bargain was flawed because it brought not too much compromise

but too little Compromises extended political citizenship to all but there were no similar bargains on economic and cultural change Using the work of the radical sociologist Harold Wolpe Friedman shows that only negotiations on a new economy and society can free South Africans from the prison of the past     *Diverse Excursions in the Southeast: Paleozoic to Present* Ann E.
