America And Americans:

America and Americans, and Selected Nonfiction John Steinbeck, 2002 In celebration of the centenary of his birth comes a brilliantly edited collection of John Steinbeck's journalism and his last published book America for Americans Erika Lee, 2019-11-26 This definitive history of American xenophobia is essential reading for anyone who wants to build a more inclusive society Ibram X Kendi New York Times bestselling author of *How to Be an Antiracist* The United States is known as a nation of immigrants But it is also a nation of xenophobia In *America for Americans* Erika Lee shows that an irrational fear hatred and hostility toward immigrants has been a defining feature of our nation from the colonial era to the Trump era Benjamin Franklin ridiculed Germans for their strange and foreign ways Americans anxiety over Irish Catholics turned xenophobia into a national political movement Chinese immigrants were excluded Japanese incarcerated and Mexicans deported Today Americans fear Muslims Latinos and the so called browning of America Forcing us to confront this history Lee explains how xenophobia works why it has endured and how it threatens America Now updated with an afterword reflecting on how the coronavirus pandemic turbocharged xenophobia *America for Americans* is an urgent spur to action for any concerned citizen America and Americans John Steinbeck, 1966-10-12 The author offers his opinions on life in America during the mid twentieth century America and the Americans Achille Murat, 1849 *A History of the American People* Paul Johnson, 2009-06-30 The creation of the United States of America is the greatest of all human adventures begins Paul Johnson's remarkable reassessment of American history And *A History of the American People* is a breathtakingly comprehensive overview of this remarkable adventure Johnson is sometimes controversial and always provocative providing new insights into the politics business arts and society of the country along with the men and women who shaped its unique character This extraordinary portrait celebrates a nation that has grown from rudimentary settlement to economic and military superpower and looks forward to a positive future As Johnson says Looking back on its past and forward to its future the auguries are that it will not disappoint humanity Paul Johnson has written many books including *Creators* *George Washington* *Modern Times* and *Art A New History* He contributes a weekly essay to the *Spectator* and a monthly column to *Forbes* He lives in London England and lectures all over the world As majestic in its scope as the country it celebrates His theme is the men and women prominent and unknown whose energy vision courage and confidence shaped a great nation It is a compelling antidote to those who regard the future with pessimism Henry A Kissinger **Coming to America (Second Edition)** Roger Daniels, 2002-10-22 With a timely new chapter on immigration in the current age of globalization a new Preface and new appendixes with the most recent statistics this revised edition is an engrossing study of immigration to the United States from the colonial era to the present **America and the Americans** Achille Murat, Henry Joseph Steele Bradfield, 1951 *American Culture* Larry Naylor, 1998-02-24 America like other modern nations is characterized by its diversity and can be seen as a complex and fragmented nation state Yet an American culture defined by those beliefs and

behaviors that all Americans do share irrespective of their other cultural affiliations does exist This book presents an innovative approach to the issues and aspects in the study of America's unique culture The real diversity of America is lost in the practice of categorizing people into social racial or ethnic groups and then attributing culture to them While not an exhaustive treatment of the culture this volume serves as a point of departure for discussions of American culture in a variety of courses both within and outside the discipline of anthropology Each chapter is accompanied by suggested readings to enable the student to pursue a more in depth study of any individual topic

My America Hugh Downs, 2002-10-15 Some of these essays are powerful and poetic Some seem to reflect a stunned condition on the part of the contributor But all of them share a newborn or reawakened feeling about the country we live in an underlying concern for it whether that concern is rooted in anger and fear or in a sensed and urgent need for action or internal correction or wagon circling Some are personal narratives that explain and justify the patriotism of the writer Some examine and praise the values that make the country great Hugh Downs from the Introduction What is the essence of America In this fascinating new collection inspired by one of our most trusted and beloved commentators 150 diverse Americans from top politicians and entertainers to firefighters and teachers express in their own words what America means to them My America includes candid insights from television journalists such as Mike Wallace and Barbara Walters politicians including former president George Bush and John Glenn writers such as Walter Anderson and Anita Diamant and entertainers among them Dave Brubeck and Patricia Neal as well as lesser known citizens from all over the country These frank and thought provoking observations from Americans of every age race religion and social position compellingly illustrate the American mosaic and offer a glimpse into the subconscious mind of this unique and wonderful nation This touching volume celebrating the similarities and the differences of a people reflects our core values and is sure to inspire pride in America Edited and with an introduction and an epilogue by Hugh Downs who coanchored ABC's 20/20 hosted NBC's Today show and has been an important American voice for more than half a century My America explores the values ideals and dreams that all Americans share At a time when people are reassessing their patriotism and rediscovering their national allegiance emotions regarding the United States are stronger and more poignant than they have been in years and this sentiment has been captured in these pages My America is a timely collection for anyone who wants to reflect on America's past or celebrate its future

America Slason Thompson,Hobart C. Taylor,1890 **The Conning of America** Patrick J. Quinn,2001 The Conning of America examines for the first time from a literary perspective the propaganda writings produced in the United States during the period of World War I This American propaganda literature was written in two distinct stages the first stage was written by the pro War establishment based on the East Coast of the United States before American entry into the conflict It attempted to vilify Germany and her Allies while at the same time showing England France and Russia as the victims of a well planned organized German plan for world domination beginning with the invasion of neutral Belgium The literature urged the United States to prepare for a German invasion of America and to be wary of German Americans who most likely were spies in the employ of the Imperial German government The second stage of propaganda literature occurred when America declared war on the Central Powers in April 1917 While still using the blood thirsty militaristic Hun as a symbol of German inherent evil the propaganda literature began to portray the Americans as the saviors of European culture American boys were being sent to Europe on a spiritual mission to purify decadent European culture while at the same time their sacrifice would rejuvenate and sanctify American values in the fire of the conflict in order for America to take her proper place in the new post war order The Ideas That Made America: A Brief History Jennifer Ratner-Rosenhagen,2019-01-03

Spanning a variety of disciplines from religion philosophy and political thought to cultural criticism social theory and the arts The Ideas That Made America A Brief History shows how ideas have been major forces in American history driving movements such as transcendentalism Social Darwinism conservatism and postmodernism **America and the Americans from a French Point of View** Price Collier,1897 **Made in America** Claude S. Fischer,2010-05-15 Our nation began with the simple phrase We the People But who were and are We Who were we in 1776 in 1865 or 1968 and is there any continuity in character between the we of those years and the nearly 300 million people living in the radically different America of today With Made in America Claude S Fischer draws on decades of historical psychological and social research to answer that question by tracking the evolution of American character and culture over three centuries He explodes myths such as that contemporary Americans are more mobile and less religious than their ancestors or that they are more focused on money and consumption and reveals instead how greater security and wealth have only reinforced the independence egalitarianism and commitment to community that characterized our people from the earliest years Skillfully drawing on personal stories of representative Americans Fischer shows that affluence and social progress have allowed more people to participate fully in cultural and political life thus broadening the category of American yet at the same time what it means to be an American has retained surprising continuity with much earlier notions of American character Firmly in the vein of such classics as The Lonely Crowd and Habits of the Heart yet challenging many of their conclusions Made in America takes readers beyond the simplicity of headlines and the actions of elites to show us the lives aspirations and emotions of ordinary

Americans from the settling of the colonies to the settling of the suburbs *The State of the American Mind: Stupor and Pathetic Docility* Amechi Okolo PhD, 2010-06-10 This book *The State of the American Mind Stupor and Pathetic Docility* Volume One begins to unravel some of the most obvious perplexing embarrassing and enduring problems and contradictions of American history and sociology viz how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement etc Further how could men of such great wisdom and intellect like George Washington James Madison Thomas Jefferson and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil because they had variously experienced white servitude and slavery themselves collude to establish and institutionalize the horrible system of Negro chattel slavery in America and also disenfranchised over 90 percent of people of their own race actions that racism could not explain The structural institutional slavery system they established and the resultant consequent racism hobbles America today as it did in the past and forced Eric Holder the Attorney General to declare that America is a nation of cowards when it comes to race discussions Thus this book starts with serious critical discussions of race in America and reveals what no textbook has ever done viz that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains Further the book also shows the year Black slavery started something almost all textbooks got wrong It also shows who was the first Black slave in America something no textbook ever mentions It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom as Obama famously told us in his race speech Thus the crowning lesson of this book in addition to discussing some critical policy issues like education health care etc is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry their universal history and experience of servitude bond indentures and slavery Nothing is more universal more common and more shared in American history and sociology than the fact that most of our ancestors black and white were servants bond indentures and slaves who were dominated and super exploited by few overlords Colonial America was the preferred dumping ground for British outcasts rejects criminals masterless class vagabonds bond indentures slaves etc until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens Thus that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom

because of the obvious reason that good powerful achieving citizens do not normally emigrate to new uncharted lands

America as Second Creation David E. Nye, 2004-09-17 An exploration of the dialogue that emerged after 1776 between different visions of what it meant to use new technologies to transform the land After 1776 the former American colonies began to reimagine themselves as a unified self created community Technologies had an important role in the resulting national narratives and a few technologies assumed particular prominence Among these were the axe the mill the canal the railroad and the irrigation dam In this book David Nye explores the stories that clustered around these technologies In doing so he rediscovers an American story of origins with America conceived as a second creation built in harmony with God's first creation While mainstream Americans constructed technological foundation stories to explain their place in the New World however marginalized groups told other stories of destruction and loss Native Americans protested the loss of their forests fishermen resisted the construction of dams and early environmentalists feared the exhaustion of resources A water mill could be viewed as the kernel of a new community or as a new way to exploit labor If passengers comprehended railways as part of a larger narrative about American expansion and progress many farmers attacked railroad land grants To explore these contradictions Nye devotes alternating chapters to narratives of second creation and to narratives of those who rejected it Nye draws on popular literature speeches advertisements paintings and many other media to create a history of American foundation stories He shows how these stories were revised periodically as social and economic conditions changed without ever erasing the earlier stories entirely The image of the isolated frontier family carving a homestead out of the wilderness with an axe persists to this day alongside later images and narratives In the book's conclusion Nye considers the relation between these earlier stories and such later American developments as the conservation movement narratives of environmental recovery and the idealization of wilderness

Century of Difference Claude S. Fischer, Michael Hout, 2008-10-16 In every generation Americans have worried about the solidarity of the nation Since the days of the Mayflower those already settled here have wondered how newcomers with different cultures values and frequently skin color would influence America Would the new groups create polarization and disharmony Thus far the United States has a remarkable track record of incorporating new people into American society but acceptance and assimilation have never meant equality In Century of Difference Claude Fischer and Michael Hout provide a compelling and often surprising new take on the divisions and commonalities among the American public over the tumultuous course of the twentieth century Using a hundred years worth of census and opinion poll data Century of Difference shows how the social cultural and economic fault lines in American life shifted in the last century It demonstrates how distinctions that once loomed large later dissipated only to be replaced by new ones Fischer and Hout find that differences among groups by education age and income expanded while those by gender region national origin and even in some ways race narrowed As the twentieth century opened a person's national origin was of paramount importance with hostilities running high against Africans

Chinese and southern and eastern Europeans Today diverse ancestries are celebrated with parades More important than ancestry for today s Americans is their level of schooling Americans with advanced degrees are increasingly putting distance between themselves and the rest of society in both a literal and a figurative sense Differences in educational attainment are tied to expanding inequalities in earnings job quality and neighborhoods Still there is much that ties all Americans together Century of Difference knocks down myths about a growing culture war Using seventy years of survey data Fischer and Hout show that Americans did not become more fragmented over values in the late twentieth century but rather were united over shared ideals of self reliance family and even religion As public debate has flared up over such matters as immigration restrictions the role of government in redistributing resources to the poor and the role of religion in public life it is important to take stock of the divisions and linkages that have typified the U S population over time Century of Difference lucidly profiles the evolution of American social and cultural differences over the last century examining the shifting importance of education marital status race ancestry gender and other factors on the lives of Americans past and present A Volume in the Russell Sage Foundation Census Series **Doctrinal Standards of Methodism, Including the Methodist Episcopal Churches** Thomas Benjamin Neely, 1918
