## America 2004 A Power But Not Super:

*The Oxford Handbook of Latin American Political Economy* Javier Santiso, Jeff Dayton-Johnson, 2012-04-11 Latin America's recent development performance calls for a multidisciplinary analytical tool kit. This handbook accordingly adopts a political economy perspective to understand Latin American economies. This perspective is not new to the region; indeed this volume consciously follows the approach pioneered by political economist Albert O. Hirschman a half century ago. But the nature of the political and economic processes at work in Latin America has changed dramatically since Hirschman's critical contribution. Military dictatorships have given way to an uneven democratic consolidation; agricultural or primary product producers have transformed into middle income diversified economies some of which are leading examples of emerging markets. So too the tools of political economy have developed by leaps and bounds. It is therefore worthwhile to take stock of and considerably extend the explosion of recent scholarship on the two way interaction between political processes and economic performance. A unique feature of the book is that it begins with a group of chapters written by high level academic experts on Latin American economics and policies who also happen to be current or past economic policy makers in the region including Fernando Henrique Cardoso former president of Brazil; Andrés Velasco former Chilean finance minister; Luis Carranza former Peruvian finance minister; Martín Redrado former governor of the Argentina central bank; and Luciano Coutinho president of Brazil's national development bank. These contributors draw upon their academic expertise to understand their experience in the trenches of policy making.

*The U.S. & NATO: An Alliance of Purpose*, *Asian Responses to the Global Financial Crisis* Jehoon Park, T. J. Pempel, Geng Xiao, 2012-01-01 This book takes account of the global financial crisis from Asian perspectives considering Asian responses to the crisis via two key arenas regionalism in Asia and the G20. The expert contributors both Asian and Western illustrate that as G20 members many Asian countries are now able to showcase their increasing powers and influence on global issues. Within this context and via multidisciplinary economic and political science perspectives the book deals with various issues such as World System analysis the debate between the Washington Consensus and the Beijing Consensus roles within the G20 and the contribution of middle powers such as Korea and Australia. The application of European experiences to Asia is also considered as are perspectives from the US. The book concludes that the key to resolving the current global economic crisis lies in how quickly a new global governance and monitoring system can be constructed and that there are multiple roles for Asian countries to play in its development. Written with a uniquely multidisciplinary approach this book will prove a fascinating read for a wide ranging audience encompassing academics students researchers and policymakers in a number of fields including Asian studies economics public policy and regional studies.
