The American Journal of Science, Vol. 50 (Classic Reprint) Edward S. Dana, 2015-07-02 Excerpt from The American Journal of Science Vol 50 Although the matter has been under consideration and discussion for a number of years the genetic relationship between the earlier members of the uranium family of radio elements is still a matter of considerable uncertainty It is generally conceded that both ionium and actinium are products of the radioactive disintegration of uranium but the exact point of origin of actinium and its immediate parentage have remained somewhat obscure and uncertain He work of Boltwood on the relative ray activity of uranium minerals and the uranium which they contained demonstrated a constancy of relationship between the radioactive constituents of the older minerals and clearly indicated a close genetic relation between uranium and actinium About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works The American Journal of Science, 1902, Vol. 13 of 163 (Classic Reprint)

Edward S. Dana, 2015-08-09 Excerpt from The American Journal of Science 1902 Vol 13 of 163 Art I An Experimental Investigation into the Skin effect in Electrical Oscillators by C A Chant 1 Introductory and Theoretical The first explicit reference to the fact that when a conductor is subjected to a periodic electromotive force the current is not uniformly distributed over a cross section of the conductor is to be found in Art 690 of Maxwell s Electricity and Magnetism Upon obtaining the equation connecting the impressed electromotive force with the effective electromotive force and the inductive electromotive force he introduces terms which express the correction of this value of the inductive electromotive force arising from the fact that the current is not of uniform strength at different distances from the axis of the wire The actual system of currents has a greater degree of freedom than the hypothetical system in which the current is constrained to be of uniform strength throughout the section Hence the electromotive force required to produce a rapid change in the strength of the current is somewhat less than it would be on this hypothesis It is quite certain however that Maxwell did not foresee the great interest and importance which the subject was destined soon to develop In a series of papers written between 1884 and 1887 Heaviside dealt with the entire question of the propagation of electric currents into conductors and of magnetization into cores when produced by a periodic electromotive force About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish

AUTHOR,2015-06-28 Excerpt from The American Journal of Science and Arts 1842 Vol 42 Art I Notes of a Botanical Excursion to the Mountains of North Carolina with some remarks on the Botany of the higher Alleghany Mountains in a letter to Sir Wm J Hooker by Asa Gray M D The peculiar interest you have long taken in North American botany and your most important labors in its elucidation indicate the propriety of addressing to

yourself the following remarks relating for the most part to the hasty collections made by Mr John Carey Mr Jas Constable and myself in a recent excursion to the higher mountains of North Carolina Before entering upon our own itinerary it may be well to notice very briefly the travels of those who have preceded us in these comparatively unfrequented regions The history of the botany of the Alleghany Mountains would be at once interesting and on many accounts useful to the cultivators of our science in this country but with my present inadequate means I can only offer a slight contribution towards that object So far as I can ascertain the younger William Bartram was the first botanist who visited the southern portion of the Alleghany Mountains About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
