## **American Airlines Timetable:**

American Airlines System Timetable Effective January 15, 1964 American Airlines, 1964      *Newark Airport* Henry M. Holden, 2009 Newark Airport was the first major airport in the New York metropolitan area. It opened on October 1, 1928, occupying an area of filled-in marshland. In 1935, Amelia Earhart dedicated the Newark Airport Administration Building, which was North America's first commercial airline terminal. Newark was the busiest airport in the world until LaGuardia Airport in New York opened in 1939. During World War II, Newark was closed to passenger traffic and controlled by the United States Army Air Force for logistics operations. The Port Authority of New York took over the airport in 1948 and made major investments in airport infrastructure. It expanded, opened new runways and hangars, and improved the airport's terminal layout. The art deco administration building served as the main terminal until the opening of the North Terminal in 1953. The administration building was added to the National Register of Historic Places in 1979.      **American Aviation Daily**, 1955-05      American Aviation, 1956      **Determinations of the National Mediation Board** United States. National Mediation Board, 1994      **Airline Operations and Delay Management** Cheng-Lung Wu, 2016-03-23 Airline Operations and Delay Management fills a gap within the area of airline schedule planning by addressing the close relationships between network development, economic driving forces, schedule demands, and operational complexity. The pursuit of robust airline scheduling and reliable airline operations is discussed in light of the future trends of airline scheduling and technology applications in airline operations. The book extensively explores the subject from the perspectives of airline economics, airline network development, and airline scheduling practices. Many operational issues and problems are the inevitable consequences of airline network development and scheduling philosophy, so a wide perspective is essential to address airline operations in their proper context. The influence of airline network development on schedule planning and operations driven by economic forces and relaxed regulations is thoroughly examined for different types of operations in aviation, such as network carriers and low cost carriers. The advantages and disadvantages of running different networks and schedules are discussed and illustrated with real airline examples. In addition, this book provides readers with various mathematical models for solving different issues in airline operations and delay management. Airline Operations and Delay Management is ideal for senior undergraduate students as an introductory book on airline operations. The more advanced materials included in this book regarding modeling airline operations are suitable for postgraduate students, advanced readers, and professionals interested in modeling and solving airline operational problems.      **U.S. Air Services**, 1945      *American Airlines System Timetable*, 1967      **Circular Series A.**, 1955      **Time** Briton Hadden, Henry R. Luce, 1929      **American Aviation**, 1963      *Congressional Record* United States. Congress, The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the
