American Drag Racing:

The Book on African American Drag Racers Robert Blackwell, 2015-04-03 Drag racing is so much fun to watch the showmanship the speed the competition the burnouts the wheel stands and the most important thing is the accessibility Drag racing is the only sport where you can buy a pass and go into the pits and talk to the drivers and actually watch the mechanics prepare the racecars The Book on African American Drag Racers is not a comprehensive or a complete book on African Americans in the sport of drag racing Why Because every day somewhere in America there is a young man or woman who will discover this great sport and seek to try their hand at making a name for themselves in the sport I believe drag racing began when the first cars were produced by Ford Motor Company and two competitive guys wanted to know whose Ford was the fastest NHRA Top Fuel Champion Antron Brown believes drag racing is so open for all races because it is nothing but a foot race with vehicles I believe drag racing is so popular in the African American community because there is such a great love for cars Also drag racing unlike NASCAR CART INDY USAC and ARCA you don't have to have a special race car only you can have any type of car as your race car Drag racing is also a sport easy to learn Over the past decade drag racing sanctioning bodies have done a great job growing their sport with the Junior Dragster programs These programs allow kids to race their low horse powered reasonably priced cars and get them involved in the sport early Some of those junior dragster racers are now competing in the professional ranks of the sport As a matter of fact Erica Enders Stevens the new Pro Stock champ began in the Jr Dragster class This book was written to help young people learn about the contributions and history of African Americans in the sport of drag racing

Drag Racing in the 1960s Doug Boyce, 2021-03-15 The 1960s were a fascinating decade on the race scene Relive the memories today through this wonderful new book Drag racing has a long and storied history Many have said that the first drag race happened shortly after the second car was made While that may or may not be true racing prior to World War II was mostly centered around dry lake activities and top speed runs After the war drag racing became organized with the formation of the NHRA and during the 1950s many tracks were built across America to accommodate the racers Technology in the 1950s centered on the manufacturers updating old flathead designs into newer overhead valve designs and the horsepower race really started to heat up In many forms of racing the 1960s brought technological evolution The decade began with big engines in even bigger stock chassis and ended with purpose built race only chassis fiberglass bodies fuel injection nitro methane and blowers Quarter mile times that were in the 13 second range in the beginning of the decade were in the 7 second range by the end New classes were formed dedicated cars were built for them and many racers themselves became recognized names in the sports landscape In Drag Racing in the 60s The Evolution in Race Car Technology veteran author

Doug Boyce takes you on a ride through the entire decade from a technological point of view rather than a results based one Covered are all the classes including Super Stocks Altered Wheelbase cars which led to Funny Cars Top Fuelers Gassers and more
