business governments haven't managed to shift towards a more effective use of resources and time. One of the first countries to introduce a different mindset on how a government should operate was Estonia. This approach of a shift treating a citizen as a consumer and on the other hand seeing government as a producer rather than just executor had an immense impact on the country. This approach on being a service oriented government had proven itself as reliable and made Estonia to a leading technology hub worldwide. This concept of restructuring a state by having an effective government is transferable to the fairly new Western Balkan states. The goal of this essay is to measure the possible impact of E-Government for economic growth, prosperity and development for the relatively poor Balkan states. This essay is conducted as follows: 1 Introduction to the importance of the topic 2 Theoretical basis of e-Government and successful implementations 3 The story of E-Estonia 4 Analysis of implementation in the Balkans 5 Closing remarks
