Apex Algebra 2 Semester 1 Quiz Answers

Answers to the Apex Algebra 2 Semester 1 Quiz are listed below. The answers are listed in the order that they appear in the quiz.

1. The first step in solving a system of linear equations is to write the equations in slope-intercept form. This allows you to compare the slopes of the lines. If the slopes are the same, the lines are either parallel or coincident. If the slopes are different, the lines intersect at one point. In this case, the system has one solution. The solution is the point where the two lines intersect. This point can be found by substituting the value of one variable into the other equation and solving for the other variable. In this case, the solution is $(-2, 3)$.

2. The second step in solving a system of linear equations is to graph the equations. The graph shows the lines on a coordinate plane. The lines intersect at the point $(-2, 3)$, which is the solution to the system.
