**Intelligent Problem Solving. Methodologies and Approaches** Rasiah Logananthara,Günther Palm,Moonis Ali,2003-07-31 The focus of the papers presented in these proceedings is on employing various methodologies and approaches for solving real life problems Although the mechanisms that the human brain employs to solve problems are not yet completely known we do have good insight into the functional processing performed by the human mind On the basis of

the understanding of these natural processes scientists in the field of applied intelligence have developed multiple types of artificial processes and have employed them successfully in solving real life problems The types of approaches used to solve problems are dependant on both the nature of the problem and the expected outcome While knowledge based systems are useful for solving problems in well understood domains with relatively stable environments the approach may fail when the domain knowledge is either not very well understood or changing rapidly The techniques of data discovery through data mining will help to alleviate some problems faced by knowledge based approaches to solving problems in such domains Research and development in the area of artificial intelligence are influenced by opportunity needs and the availability of resources The rapid advancement of Internet technology and the trend of increasing bandwidths provide an opportunity and a need for intelligent information processing thus creating an excellent opportunity for agent based computations and learning Over 40% of the papers appearing in the conference proceedings focus on the area of machine learning and intelligent agents clear evidence of growing interest in this area

**Advances in Metaheuristic Algorithms for Optimal Design of Structures** Ali Kaveh, 2021-01-21 This book presents efficient metaheuristic algorithms for optimal design of structures Many of these algorithms are developed by the author and his graduate students consisting of Particle Swarm Optimization Charged System Search Magnetic Charged System Search Field of Forces Optimization Democratic Particle Swarm Optimization Dolphin Echolocation Optimization Colliding Bodies Optimization Ray Optimization These are presented together with algorithms which are developed by other authors and have been successfully applied to various optimization problems These consist of Partical Swarm Optimization Big Band Big Crunch algorithm Cuckoo Search Optimization Imperialist Competitive Algorithm and Chaos Embedded Metaheuristic Algorithm Finally a multi objective Optimization is presented to Solve large scale structural problems based on the Charged System Search algorithm In the second edition seven new chapters are added consisting of Enhance colliding bodies optimization Global sensitivity analysis Tug of War Optimization Water evaporation optimization Vibrating System Optimization and Cyclical Parthenogenesis Optimization algorithm In the third edition five new chapters are included consisting of the recently developed algorithms These are Shuffled Shepherd Optimization Algorithm Set Theoretical Shuffled Shepherd Optimization Algorithm Set Theoretical Teaching Learning Based Optimization Algorithm Thermal Exchange Metaheuristic Optimization Algorithm and Water Strider Optimization Algorithm and Its Enhancement The concepts and algorithm presented in this book are not only applicable to optimization of skeletal structure finite element models but can equally be utilized for optimal design of other systems such as hydraulic and electrical networks
