Business Studies September 2013 Memo Grade 11

J. Drake, T. Gedeza, R. Rehbock

Business Studies September 2013 Memo Grade 11:

Patriarchy Inc. Cordelia Fine, 2025-08-19 A razor sharp and quick witted analysis of why we need a new approach to fixing the gender inequality embedded in work. Work remains much as it always has: men occupy the vast majority of leadership roles and are overrepresented in positions from engineer to plumber. We see many jobs as male or female, with women dominating in healthcare and childcare professions. Pretending that this is the natural state of things or that instead both sexes should submit to working 24/7 is just not right. In *Patriarchy Inc.* Cordelia Fine examines with razor sharp and quick witted analysis why gender inequality is embedded in the workplace and why it has to change. Drawing on theories from evolutionary science, psychology, economics, and sociology, she examines two of the most prominent movements in the corporate world. The Different But Equal viewpoint espouses that women are in the jobs they want despite their lower status and salaries. In the meantime, DEI (Diversity, Equity, Inclusion) has become a slogan that emphasizes productivity and profit, not fair play. Fine shows how both are wrong and the bad effects on everyone when men are still stuck in traditional breadwinner roles and women are having to fight for their due. Offering perceptive and much needed insight into the current state of work, *Patriarchy Inc.* explores how we can get closer to achieving equality even if it means upturning business as usual. *Open to Think* Dan Pontefract, 2018-09-11 While it may not occur to us on a daily basis, there is a widespread cultural tendency toward quick decisions and quick action. This pattern has resulted in many of our society's greatest successes but even more of its failures. Though the root cause is by no means malicious, we have begun to reward speed over quality, and the negative effects suffered in both our personal and professional lives are potentially catastrophic. Best selling author and Chief Envisioner Dan Pontefract offers the solution to this predicament with what he coins Open Thinking: a cyclical process in which creativity is encouraged, critiquing leads to better decisions, and thoughtful action delivers positive, sustainable results. He proposes a return to balance between the three components of productive thought: dreaming, deciding, and doing. Based on organizational and societal data, academic research, historical studies, and a wide range of interviews, *Open to Think* is an appeal for a world of better thinking. Pontefract introduces tangible, actionable strategies to improve the way we think as organizations and individuals. The Theory and Practice of Change Management John Hayes, 2021-12-29 Technological advances, an increasingly globalized workforce, and seismic global events mean that change is a constant feature of business life today. The consequences of not managing change effectively can be devastating for businesses. How can managers deal with change brought about by unpredictable events? How can they embrace change and communicate its benefits to stakeholders? How can organizations ensure the ongoing success of change? John Hayes's bestselling textbook equips you with the practical tools and academic knowledge to tackle these questions and many more. Offering unrivalled breadth, it will guide you clearly through all stages of the change process, from recognizing the need for change to ensuring its successful implementation. Its unique underpinning framework, based on a process model of change, will help you to view change as purposeful and ordered rather

Human Rights and Drug Control Melissa Bone, 2019-10-10 This book uses a human rights perspective developed philosophically politically and legally to change the way in which we think about drug control issues The prohibitionist approach towards tackling the drugs problem is not working The laws and mentality that see drugs as the problem and tries to fight them makes the drugs problem worse While the law is the best placed mechanism to regulate our actions in relation to particular drugs this book argues against the stranglehold of the criminal law and instead presents a human rights perspective to change the way we think about drug control issues Part I develops a conceptual framework for human rights in the context of drug control philosophically politically and legally and applies this to the domestic UK and international drug control system Part II focuses on case law to illustrate both the potential and the limitations of successfully applying this unique perspective in practice The conclusion points towards a bottom up process for drug policy which is capable of reconfiguring the mentality of prohibition This book will be of interest to students and scholars of human rights criminal law criminology politics and socio legal studies
