International Handbook of Phobic and Anxiety Disorders in Children and Adolescents

Thomas H. Ollendick, Neville J. King, W. Yule, 2013-11-11. Reknowned authorities offer the first international handbook on anxiety and phobic disorders in children and adolescents. Using DSM IV and ICD classifications, this comprehensive and up to date volume addresses issues related to diagnostic classification, epidemiology, etiology, assessment and treatment. With its case studies, this volume makes a practical reference for clinicians, researchers and students.

Testing and Assessment in Counseling Practice

C. Edward Watkins, Jr., Vicki L. Campbell, 2012-12-06. The primary purpose of this revision remains identical to that of the first edition to show how key personality, cognitive, behavioral and vocational tests assessment procedures can be used by counselors in their work with clients. Too often, assessment books only provide the reader with information about tests and assessment procedures. They do not, however, take the next step showing readers how these tests and assessment procedures can be used and integrated into the

actual work of counseling This revision is designed to fill that void Chapter authors all of whom are experts in their respective topic areas share the theoretical and research backgrounds about a particular test assessment procedure and then provide a case example or examples to show how assessment data can be meaningfully incorporated into the counseling process **ABNORMAL PSYCHOLOGY** DEBORAH C. BEIDEL,2022 **Abnormal Psychology and Life** Kearney,2014

Handbook of Personality, Third Edition Oliver P. John, Richard W. Robins, Lawrence A. Pervin, 2008-08-05 This authoritative handbook is the reference of choice for researchers and students of personality. Leading authorities describe the most important theoretical approaches in personality and review the state of the science in five broad content areas: biological bases, development, self and social processes, cognitive and motivational processes, and emotion, adjustment, and health. Within each area, chapters present innovative ideas, findings, research designs, and measurement approaches. Areas of integration and consensus are discussed, as are key questions and controversies still facing the field. **Phobic and Anxiety Disorders in Children and Adolescents** Thomas H. Ollendick, John S. March, 2004-01-15 This comprehensive interdisciplinary guidebook is designed for the mental health practitioner seeking to utilize proven and effective interventions with children and adolescents suffering from significant anxiety and phobic disorders. Each chapter is co-authored by a clinical child psychologist and a child psychiatrist, framing the volume's unique and balanced perspective. In addition, each chapter presents state-of-the-art assessment and treatment strategies for a panoply of phobic and anxiety disorders, including both psychosocial and pharmacological interventions. Moreover, the volume addresses important conceptual, epidemiological, and ethical issues in working with children and adolescents. All in all, this guide will help address the wide chasm between clinical research and clinical practice, uniting the forces intrinsic to child psychiatry and clinical child psychology.
