*Technology in Language Learning: An Overview* Bryan Smith, 2015-09-16 This module on computer assisted language learning provides novice and experienced

second and foreign language L2 teachers alike with an introduction to the field of computer assisted language learning CALL. The module first provides a historical overview of the field and then explores the most widely researched areas within CALL. The module examines findings of research into computer mediated communication for L2 learning as well as L2 skill area instruction in technology enhanced settings. The unit then turns to a discussion of teacher and learner standards for using CALL followed by a discussion of how one may find and evaluate CALL resources appropriate for specific instructional contexts. The module ends with an introduction to four of the newest and most exciting areas in CALL: gaming, fan fiction, digital story telling and mobile assisted language learning. This book is the result of five years of intensive dedication to teaching innovation and curriculum development and offers a series of studies exploring how mobile technologies in particular and mobile learning in general may be used for second language teaching and learning in a wide variety of environments. Although a strong emphasis is laid on issues to do with autonomy and independence in second language acquisition, the volume also examines the connections and interrelations of mobile learning and second language teaching and learning process on the whole as well as the process of adoption of new mobile technologies as teaching tools in various communities across the globe. The volume is targeted at a broad spectrum of readers including academics in the field of e learning, online learning and ICT based learning with an interest in exploring the possibilities of mobile assisted learning and the new developments of ICT in particular, portable devices for the foreign language classroom. It is most attractive to those interested in the emerging field of mobile assisted learning in general and its potential for foreign language teaching and learning in particular. The Effects of Duolingo's Stories and Podcast Features on the Development of Explicit and Implicit Knowledge Anthony James Brandy, 2021. Some second language acquisition (SLA) scholars have characterized the astronomic rise in usership of language learning applications as a revolution of language learning (pages 25). Alongside this rise in usership is also a small but steady stream of research that has investigated the effects of these applications on user motivation (Isbell and others 2017; Loewen and others 2019; learning gains on collegiate foreign language tests (Krashen 2014; Vesselinov and Grego 2012) and oral communicative ability (Loewen and others 2020). This thesis investigated the role of meaningful input in the form of two new features of the language learning application Duolingo. The two under researched features (Savvani 2019) are the Stories feature which is performed by voice actors and provides the learner with short stories intermittent with comprehension check and translation activities and the Podcast feature which are 20 to 30 minute podcast episodes told primarily in the L2 with no user interaction involved (Jiang and others 2020). These two features offer users more meaningful input which Duolingo has been frequently criticized for excluding in its curriculum (e.g. Crowther and others 2017; Teske 2017). To investigate the effect these new features have on users, this study utilized a quasi experimental case study design looking

at two Spanish L2 participants performance on a battery of implicit and explicit knowledge tests over the course of a four week treatment period The results indicated a steady increase in both implicit and explicit knowledge for the Stories participant over time but that the Podcast participant was too advanced to make meaningful gains on the test battery as a result of Duolingo Podcast use Despite this the Podcast participant still made meager gains in implicit but not explicit knowledge The battery of tests also accessed different language domains such as receptive e g reading and listening and productive e g speaking and writing skills These findings add nuance to previous critiques of Duolingo and Mobile Assisted Language Learning MALL in general that posited that the primary outcome of MALL app usage is receptive explicit knowledge e g Krashen 2014 Loewen and others 2020 First it was found that the Podcast participant showed meager gains in the measure of productive implicit knowledge the Oral Narrative Task but decreased in performance on the measure of receptive explicit knowledge the Untimed Grammaticality Judgement Task Interestingly the Stories participant showed a large jump of 22% in receptive implicit knowledge of Spanish as measured by the Timed Grammaticality Judgement Task Neither participant showed meaningful gains in the measure of productive explicit knowledge the Metalinguistic Knowledge Task Although there was a slight effect found for receptive explicit knowledge for the Stories participant the data from both participants in tandem discount the idea that app based MALL prioritizes receptive explicit knowledge at least when considering these novel input based features of Duolingo
