**Velocity Management** John Dumond, 2001 Velocity management brought a new way of doing business to U S Army logistics with a renewed focus on the Army customer and an approach for process

improvement that cuts across time quality and cost The authors reveal the motivations methodology and management structure behind the initiative the process improvements that have led to such quick and impressive results and the steps that have been taken to develop and institutionalize the capabilities needed to achieve and sustain future improvement Lessons learned can be readily adapted for other business models      **High-Performance Government** Robert Klitgaard,Paul C. Light,John Dumond,2005-03-24 In 2003 the National Commission on the Public Service chaired by Paul Volcker issued a report detailing problems within the federal government today and recommending changes in its organization leadership and operations This book suggests practical ways to implement the recommendations and defines a research agenda for the future Thirteen essays address the primary problem areas identified by the Volcker Commission and the commission report itself is included      Proceedings of the XIV INTERNATIONAL SYMPOSIUM SYMORG 2014 Aleksandar Marković,Slađana Barjaktarović Rakočević,2014-06-05      **Annual Report** Rand Corporation,2000

*Leveraging Complementary Distribution Channels for an Effective, Efficient Global Supply Chain* Eric Peltz,Marc L. Robbins,2007 DoD makes use of five different distribution channels to sustain U S military forces overseas Three are air delivery channels and two are by sea These channels offer varying speeds of delivery and have different costs In addition to these variables there are certain practical constraints that must be taken into account in making choices among channels and for surface transportation the marginal cost of additional inventory must also be considered In this briefing we analyze the implications of all these factors for how the channels should be used which transportation modes should be chosen and where materiel should be stocked to provide effective support as efficiently as possible We describe the distribution choices for some illustrative units in Iraq and compare them with the ideal model resulting from our analysis We find that through gradual evolution the sustainment structure for Iraq is beginning to match the model We offer several guidelines for improving sustainment in the near term by bringing current practices closer to the ideal      *Army Logistician* ,2002 The official magazine of United States Army logistics      Supporting Expeditionary Aerospace Forces Patrick Mills,Amatzia Feinberg,2001 In the years to come the effectiveness of the Expeditionary Aerospace Force will pivot largely on the support system that underlies it termed the Agile Combat Support ACS system One key component of the ACS system is the electronic countermeasure ECM pod system Accordingly this documented briefing outlines the findings of a study that assessed the utility of the Reliability Availability and Maintainability of Pods RAMPOD database as an analytical tool in support of the ECM pod system The study found that RAMPOD has significant potential for supporting ECM pod analysis particularly in the tracking and displaying of trends for pod removal repair times and in shop queue The study also found a significant number of missing data elements that could adversely affect the efficacy of the RAMPOD system In addition the RAMPOD data warehouse was found to contain data that couldn t be readily accessed through the current web based tool      Selected Rand Abstracts Rand Corporation,2000 Includes publications previously listed in the supplements to the Index

of selected publications of the Rand Corporation Oct 1962 Feb 1963      **Rand Review** ,2002      **International Review of Public Administration** ,2003      *Right Price, Fair Credit* Ellen Marie Pint,2002 Under the Army's financial management system for spare parts logistics customers receive budgets to buy spare parts from the supply system and receive credits for returning parts to the supply system either for repair or because they are no longer needed in local inventories The Army's wholesale inventories of spare parts are financed by a stock fund which uses its income from the sale of parts net of credits issued to customers to pay for repairs and procurement of replacement parts Some installation level or retail inventories are also financed by stock funds During fiscal year 2001 the Army's stock funds were in a period of transition from separate wholesale and retail components to a Single Stock Fund SSF As part of this change the Army implemented new price and credit policies for spare parts In this document the authors introduce a set of criteria to assess price and credit policy changes in terms of their effectiveness in meeting the overall objective of maintaining the logistics customer's ability to meet mission requirements while keeping weapon systems in operating condition at the lowest total cost to the Army The authors then use these criteria to compare and evaluate pre SSF SSF and proposed future price and credit policies and define the characteristics of an optimal Army price and credit policy      Rail Transport Journal ,2003      **Books In Print 2004-2005** Ed Bowker Staff,Staff Bowker, Ed,2004      □□□□□□□□□□ □□□,2005      *American Book Publishing Record* R.R. Bowker Company,1978      *Transforming US Army Supply Chains* Greg Parlier,2011-03-15 This text offers a practical approach for understanding the US Army's extremely complex global logistics system widely acknowledged as one of the largest in the world The focus is on inventory management policy where prescriptions are illuminated through the prism of an enterprise supply chain analysis Although Army aviation logistics examples are emphasized throughout the fundamental issues and potential solutions are broadly applicable to other large scale military and industrial supply chains as well Following a summary of recent trends for background and context a multi stage conceptual model of the logistics structure is presented to segment and guide the effort This multi stage model is used to systematically analyze major organizational components of the supply chain diagnose structural disorders and prescribe solutions Integration challenges are addressed using cost benefit perspectives which incorporate supply chain objectives of efficiency resilience and effectiveness The design and evaluation section proposes an analytical architecture consisting of four complementary modeling approaches collectively referred to as dynamic strategic logistics planning to enable a coordinated enterprise approach for Army Logistics Transformation An organizational construct is presented for an engine for innovation to accelerate and sustain continual improvement for Army logistics and supply chain management a Center for Innovation in Logistics Systems Finally strategic management challenges associated with enterprise integration and transformational change are addressed organizational design management information and decision support systems strategic alignment for a learning organization and workforce considerations including human capital investment needs The text concludes with a relevant historical vignette and closes
