Criner, Rodger E. Barnette, Gilbert E.

D'Alonzo, 2010-06-27 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up to date clinical information. An extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines a comprehensive multidisciplinary approach presenting the information is essential similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome an expanded discussion of the physiology and operation of mechanical ventilation obstetrical care in the ICU neurosurgical emergencies acute coronary syndromes cardiac arrhythmias role of whole body rehabilitation in the ICU ethical conduct of human research in the ICU and nursing care of the ICU patient **Critical Issues in Healthcare Policy and Politics in the Gulf Cooperation Council States**

Ravinder Mamta, Albert B. Lowenfels, 2018-01-02 This is the first book to examine challenges in the healthcare sector in the six Gulf Cooperation Council (GCC) countries Saudi Arabia, Oman, the United Arab Emirates, Qatar, Kuwait and Bahrain. These countries experienced remarkably swift transformations from small fishing and pearl diving communities at the beginning of the twentieth century to wealthy petro states today. Their healthcare systems however are only now beginning to catch up. Rapid

changes to the population and lifestyles of the GCC states have completely changed and challenged the region's health profile and infrastructure. While major successes in combatting infectious diseases and improving standards of primary healthcare are reflected in key health indicators, new trends have developed increasingly lifestyle or wealthy country diseases such as diabetes, heart disease, and cancer have replaced the old maladies. To meet these emerging healthcare needs, GCC states require highly trained and skilled healthcare workers in an environment that supports local training, state-of-the-art diagnostic laboratories, and hospitals research production and dissemination and knowledge acquisition. They face shortages in most if not all of these areas. This book provides a comprehensive study of the rapidly changing health profile of the region, the existing conditions of healthcare systems and the challenges posed to healthcare management across the six states of the GCC.

NATIONAL HIGHWAYS AND MOTORWAY POLICE IN PAKISTAN: An Illuminative Study Saima Manzoor Arain, Akif Manzoor Arain, 2015-06-25. The Motorway Police System in Pakistan is designed in a manner which enables law enforcement and does not encourage corruption. Enforcement action is transparent because of the tools made available and the manner in which SOPs have been prepared. It operates a traffic law which is as good as any in the world. The officers work in eight-hour shifts and get weekly holidays by rotation. They live and work on the highway and are well compensated to be able to run two kitchens. In view of this, the Motorway Police has become a model for policing in Pakistan. Asad Jahangir Khan, Ex IG NH MP. Thus, it is thought provoking, it is revolutionary, opening new vistas and bold horizons of intellectual endeavors. This book is scholarly written and exquisitely presented.
