Keith Clarke,2022-08-25 This book is about the company culture that helped drive Arm Limited s spectacular growth to become the world s leading semiconductor Intellectual Property IP company Its extremely power efficient processor technology has been licensed to hundreds of semiconductor chip manufacturers and Original Equipment Manufacturers OEMs Arm is still largely unknown to the broader public yet Arm s technology is nearly ubiquitous and has been a foundational building block of the global rise of the smartphone Arm based microprocessors power over 95% of the world s mobile phones However this book is not about technology It s about how a company grew from being a small start up in Cambridge UK with 12 people and a 1 75m cash investment to a global organization with over 5 000 employees in over 50 countries and more than 1 5bn revenue in 2016 when SoftBank acquired it for 32bn Arm Limited was founded as Advanced RISC Machines in November 1990 a joint venture between a British computer manufacturer Acorn Computers Limited and its much larger US competitor Apple Computers Inc The purpose of the new venture was to develop and proliferate the uniquely power efficient and high performance RISC based microprocessor technology that had been developed several years earlier by Acorn Using first hand interviews with founders and the author s knowledge this book charts some of the key people involved in the birth of the technology and the company Advanced RISC Machines It considers how their behaviors and decisions led to the creation of the licensing business model and the strategy that underpinned Arm s later success This

book reveals some of the layers that help explain how the combination of culture strategy and execution built the world's leading semiconductor IP company. It provides insight into ten essential ingredients of Arm's success including the company's unique proposition, how the early business model and strategy were formed, the creation and evolution of the winning culture, the ecosystem of shared success, and how Arm stayed unified throughout a period of extraordinary growth. The purpose of the book is to help readers create a culture of inclusiveness, collaboration, and innovation within their own organizations. The book provides examples from Arm's history which should provide inspiration and guidance for making the necessary changes to enable a winning culture. Additional details of interest to history lovers include the stories behind the BBC Microcomputer prototype, the Acorn RISC Machine microprocessor development, Advanced RISC Machines creation, the partnership focused licensing business model's development, the nearly lost design win at Nokia for their new GSM mobile, the 20 billion selling Cortex M product that almost didn't happen, and the battle for smartphones and tablets with Intel.

Wearable Technology. The usability of the Apple Watch 2 Series and its impact on society Harry Mwololo, 2018-01-29. Scientific Essay from the year 2017 in the subject Communications/Multimedia/Internet/New Technologies. Egerton University language English. abstract: Wearable technologies such as Apple Watch Series 2 have created a significant impact on the manner in which people track their fitness and personal health. Apple Watch Series 2 has been a significant device in the wearable technology market. Apart from provision of basic health features, the technology offers other daily operations features like payments, navigations, and information sharing for both personal and business use. To examine the technology, the paper focused on exploring the usefulness of the Apple Watch 2 series, its impact to society and IT sector, and other technologies that are competing with Apple Watch 2. The writer, through this comparison, was able to provide his opinion on the technology and also conclusion of the same technology. The paper concluded that Apple Technology is a beneficial technology to the users because of its quality and efficient features that offer the user health benefits as well as other personal life tracking benefits. However, for users who might not need all the features in the Watch, it is convenient to use other technologies such as Fitbit and the other basic fitness brands.
