*The Impact of Online Music Services on the Music Recording Industry* Daniel Wiechmann, 2009-10-04 Master s Thesis from the year 2009 in the subject Communications Multimedia Internet New Technologies grade B1 University of Glasgow course Media Management language English abstract The music business is one of the few industries that has trouble growing profits in its transition to digital Digital media downloads mobile music streams music flat rates peer to peer networks and the rise of freeconomics on the Internet are partly responsible for the reduction in CD sales in recent years The question that is most important for the industry is how the widespread of freely available content and illegal downloading can be monetised One approach to model around the main threats to the music industry is the development of online music services Thus this study is an attempt to address the issue of what are the opportunities and challenges posed by online music services for the music recording industry Referring to empirical findings

of a consumer survey and expert interviews both opportunities and challenges can be identified for the music recording industry. The opportunities surrounding the development of these services are encouraging. Deriving from the challenges the music recording industry must ensure that online music services are a supplement to traditional ways of consumption and do not turn into a replacement of physical music consumption. Concluding online music services have a small impact on the recording industry. The industry might benefit from closely cooperating with online music services by learning more about consumers' tastes. Nevertheless, the online businesses are struggling to break even and revenues from streaming will not overcome legal downloads or CD sales as major revenue stream anytime soon. An intimate look at the life and music of modern pop's most legendary figure Taylor Swift from leading music journalist Rob Sheffield. A cultural phenomenon. A worldwide obsession. An agent of emotional chaos. There's no parallel to Taylor Swift in history: a teenage girl who turns into the world's favorite pop star, songwriter, storyteller, guitar hero, live performer, changing how music is made and heard. An all-time great on the level of The Beatles, Prince, or David Bowie. **Heartbreak Is the National Anthem** How Taylor Swift Reinvented Pop Music is the first book that goes deep on the musical and cultural impact of Taylor Swift. Nobody can tell the story like Rob Sheffield, the bestselling and award-winning author of *Dreaming the Beatles*, *On Bowie*, and *Love Is a Mix Tape*. The legendary Rolling Stone journalist is the writer who has chronicled Taylor for every step of her long career, from her early days to the Eras Tour. Sheffield gets right to the heart of Swift and her music, her lyrics, her fan connection, her raw power. At once one of the most beloved music figures of the past two decades and one of the most criticized, Taylor Swift is known as much for her life beyond her music as she is for her hits, the most public of stars yet also the weirdest and most mysterious. In the tradition of Sheffield's *Dreaming the Beatles*, **Heartbreak Is the National Anthem** will inform and delight a legion of fans who hang on every word from Taylor and every word Rob writes on her. **Adoption of Smart Home Speakers** Jakob Summer, 2023-04-05 Master's Thesis from the year 2021 in the subject Business economics General grade 1.00 Management Center Innsbruck Management Center Innsbruck language English abstract Due to technological progress, smart speakers have entered the market in recent years and have already been adopted by certain parts of the population. Although several studies have tried to explain the crucial factors for smart speaker adoption, there is still no common understanding and there are significant gaps in the literature analysing the adoption of smart speakers at their current technical level in specific countries. Therefore, this study aims to identify factors influencing the intention to use smart speakers in Germany. By reviewing the literature on innovation acceptance with an

emphasis upon adoption studies of voice controlled technologies the research model of this thesis was developed The hypothesized effects of the twelve constructs in the model were tested using an online survey with questionnaires as data collection instruments among 233 German non adopters The study found that certain constructs specifically enjoyment privacy concerns usefulness and social influence were significant predictors of intention to use System quality and smart speaker complementarity with apps and services additionally emerged as predictors of perceived usefulness Results suggest that companies should pay particular attention to these factors when marketing and further developing smart speakers The factors identified might further influence the acceptance of similar IT products
