Applied Computing & Information Technology Roger Lee, 2017-07-14 This book presents the scientific outcome of the 5th International Conference on Applied Computing and Information Technology ACIT 2017 which was held on July 9-13, 2017 in Hamamatsu, Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users and students to discuss the numerous fields of computer science, to share their experiences and to exchange new ideas and information in a meaningful way. The book includes research findings on all aspects: theory, applications and tools of computer and information science and discusses the practical challenges encountered along the way and the solutions adopted to solve them. This book features 12 of the conference's most promising papers written by authors who are expected to make important contributions to the field of computer and information science.

Applied Computing and Information Technology Roger Lee, 2019-08-21 This book gathers the outcomes of the 7th International Conference on Applied Computing and Information Technology ACIT 2019 which was held on May 29-31, 2019 in Honolulu, Hawaii. The aim of the conference was to bring together researchers and scientists, businesspeople and entrepreneurs, teachers, engineers, computer users and students to discuss the various fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Further, they presented research results on all aspects: theory, applications and tools of computer and information science and discussed the practical challenges encountered in their work and the solutions they adopted to overcome them. The book highlights the best papers from those accepted for presentation at the conference. They were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round, 15 of the conference's most promising papers were selected for this Springer SCI book and not the conference proceedings. We eagerly await the important contributions that we know these authors will make to the field of computer and information science. *Applied*

Computational Intelligence and Soft Computing in Engineering Khalid, Saifullah, 2017-09-13 Although computational intelligence and soft computing are both well-known fields, using computational intelligence and soft computing in conjunction is an emerging concept. This combination can effectively be used in practical areas of various fields of research. *Applied Computational Intelligence and Soft Computing in Engineering* is an essential reference work featuring the latest scholarly research on the concepts, paradigms and algorithms of computational intelligence and its constituent methodologies such as evolutionary computation, neural networks and fuzzy logic. Including coverage on a broad range of topics and perspectives such as cloud computing, sampling in optimization and swarm intelligence, this publication is ideally designed for engineers, academicians, technology developers, researchers and students seeking current research on the benefits of applying computational intelligence techniques to engineering and technology.
