**Macroeconomics with Chinese Perspectives** Junhui Qian, 2023-10-19. This is an intermediate level macroeconomics textbook for undergraduate students who wish to gain some exposure to the Chinese economy while learning macroeconomics. And this is a truly intermediate level textbook since it provides a calculus treatment of the standard intermediate macroeconomic theories such as the Solow models, IS-LM models, and so on. Students in many countries need an alternative macroeconomics textbook that is less American-centric than the existing ones. In particular, students in many developing countries need to learn about theories e.g. the Lewis model of economic development and cases like the Asian Financial Crisis that are relevant to developing countries but are ignored in mainstream English textbooks. The use of calculus makes the textbook concise without sacrificing depth. And most importantly, after some training, students would feel comfortable with applying mathematics, the engine of inquiry to macroeconomic analysis. Which Degree in Britain, 1999.
