Accommodation - Focusing of the eye in a near object through relaxation of the ciliary muscle and thickening of the lens.

Amblyopia - The loss of vision without any apparent disease of the eye.

Ametropia - A refractive error in which the eye, when in a state of rest, does not focus the image of an object upon the retina, includes hyperopia, myopia, and astigmatism.

Aniseikonia - A condition in which the ocular image of an object as seen by one eye differs so much in size or shape from that seen by the other eye that the two images cannot be fused into a single impression.

Anisometropia - A condition in which the refractive error of one eye significantly differs from that of the other; each eye must have the same sign i.e. Both eyes are myopic or hyperopic.

Antimetropia - The refractive condition whereby the signs in each eye are opposite; one eye is hyperopic while the other is myopic.

Aphakia - An absence of the crystalline lens of the eye.

Aqueous humor - The clear watery fluid that fills the anterior and posterior chambers within the front part of the eye.

Astigmatism - A refractive error that prevents the light rays from coming to a single focus on the retina because of the different degrees of refraction in the various meridians of the eye.

Cataract - A condition in which the crystalline lens of the eye, or its capsule, or both become opaque with consequent loss of visual acuity.

Choroid - The vascular intermediate coat that furnishes nourishment to other parts of the eyeball.

Ciliary body - That portion of the vascular coat between the iris and the choroid. It consists of ciliary processes and the ciliary muscle.

Compound hyperopic astigmatism - The refractive error which results in two points of focus falling behind the retina.

Compound myopic astigmatism - The refractive error which results in two points of focus falling in front of the retina.

Cornea - The clear transparent portion of the outer coat of the eyeball forming the covering of the aqueous chamber.

Crystalline lens - A transparent colorless body suspended in the front part of the eyeball, between the aqueous and the vitreous, the function of which is to bring the rays of light to focus on the retina.

Diplopia - The seeing of one object as two.

Emmetropia - The refractive condition of the normal eye when the eye is at rest, the image of distant objects is brought to a focus on the retina.

Fusion - The power of coordination by which the images received by the two eyes become a single image.

**Optician Essentials and Advanced Exam Practice Test** Erich W. Mack,2013-12-08 Success as a professional optician starts with this text This guide is an invaluable source for learning more advanced ophthalmic optics basic business principals troubleshooting patient problems and solving some of the more tricky optics quandaries This text reviews the more advanced topics seen on ABO and ABO Advanced exams Also included are overviews on new topics such as expanded infection types additional optics equations and vision therapy For those planning on taking the advanced level ABO exam there is included a 198 question practice test and answer key The practice questions are based on the most recent exam topics Excerpts It is difficult perhaps impossible to pinpoint when the first corrective lens was created The history of optics and spectacles dates back very far in time before a written history and involves a variety of characters The earliest lens called the Nimrud lens could date back as far as 7000 B C Current theory states that ancient Mesopotamians called Assyrians manufactured the Nimrud lens which is a magnifying lens to help them carve intricate patterns On the other hand the Nimrud lens could be what is called a burning glass and used to start fires and not a occupational aid lens at all Either way the rock crystal Nimrud lens has a 3x magnification power and is the oldest lens of any type that we know of At the time of this writing it is being housed and displayed at the British Royal museum and worth seeing for yourself Another possible

early lens can be traced through written account to Nero of ancient Rome. It is accepted as fact that he was quite myopic but a tantalizing theory also states he used a polished emerald to peer through while watching gladiatorial games. Could this be the first myopic corrective lens? As an optician, it is your job to be an expert in this exciting field and you also have the honor of being part of its history. With the evolution of mass-produced frames, inexpensive advanced lenses, and an online marketplace, it is more important than ever to stay abreast of the future of ophthalmics and understand its past. For opticianry to continue to thrive, it is vital to position yourself as the definitive professional. This will allow you to separate yourself from the online marketplace and embrace the opportunity to profitably offer products tailored to your patrons' needs. Business: Most business plans are structured into seven sections. A completed business plan should be shared with employees to create a cohesive team focus. Also, investors will request to see the business plan to determine the risk of failure or likelihood of success. The seven sections are:

1. Executive Summary: A concise summation or outline of the business plan. Usually, this part is written last as it is the most important section. Some items that are mentioned in the executive summary are business name, concept, products, services, mission statement, financial requirements, and essential milestones.
2. Company Description: This is a broad view of your company, how it is structured, and type of business it will perform. Some items mentioned in the Company Profile are legal form of business, needs the business will satisfy, brief history, overview of products and customers, short long term goals.
3. Products Services: A description of how you will turn a profit aka what are you selling. Pictures, diagrams, and prototypes are often required. Suppliers, costs, and net revenue expected for each product are discussed here.
4. Market Analysis: Economics. Outline your market research here and present your conclusions about your market analysis. Include market size, trends, patterns, and potential growth here.
