*Legal Issues of Mobile Apps* Ioannis Iglezakis, 2020-05-12 In less than ten years touchscreen smartphones and their apps have created an unprecedented technological revolution Yet

they are rife with serious potential for breaches of privacy and security and a lack of uniform rules makes navigation of the legal landscape extremely difficult. Addressing this unstable regulatory environment, this concise practical guide for the first time provides a measure of legal certainty. It examines case law and legislation in Europe and the United States to highlight the rights and obligations of all actors involved in the marketing of mobile apps, bring to light essential principles and recommend some viable solutions. Nine experts all versed in the latest developments in international and national laws and regulations affecting digital mobile technology examine such key topics as the following: contract law as applied to the sale and use of smartphone apps; intellectual property rights in mobile apps; protection of users' data; protection of personal data; apps as hostile code and malware; delivery mechanisms; competition law issues; taxation of mobile apps; liability issues for app developers and distributors; and implications of the EU's new regulatory framework on online platforms. Because it is difficult for a basic user to understand how vulnerable everyday apps can be and because every new information technology platform delivers new risks along with its benefits, legal practitioners working in a wide variety of fields will be increasingly called upon to engage with both personal and enterprise security and privacy breach cases arising from the use of mobile apps. This deeply informed practical analysis goes a long way toward ensuring appropriate handling of legal issues which arise in the mobile app context. Every practitioner, government official and software developer will welcome this much needed volume.

Privacy Concerns Surrounding Personal Information Sharing on Health and Fitness Mobile Apps Sen, Devjani, Ahmed, Rukhsana, 2020-08-07 Health and fitness apps collect various personal information including name, email address, age, height, weight and in some cases detailed health information. When using these apps, many users trustfully log everything from diet to sleep patterns. However, by sharing such personal information, end users may make themselves targets to misuse of this information by unknown third parties such as insurance companies.
