**Applied Dynamic Programming** Richard E. Bellman, Stuart E Dreyfus, 2015-12-08 This comprehensive study of dynamic programming applied to numerical solution of optimization problems It will interest aerodynamic control and industrial engineers numerical analysts and computer specialists applied mathematicians economists and operations and systems analysts Originally published in 1962 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

**Network Optimization: An Introduction to the Network Reconstruction Approach** Elias Munapo, Santosh Kumar, Philimon Nyamugure, Trust Tawanda, 2025-07-03 For every problem mathematical or otherwise there is more than one approach and much depends on the ingenuity of the person concerned Consider that a person is interested in picking some fruit from a tree and is considering multiple picking options One possibility is if one can reach the fruit just snip it to retrieve it The second possibility is to alternatively apply force and detach the fruit from the tree If neither option is possible the fruit can still be detached from the tree but how A third possibility lies in the fact that just holding on to the fruit and turning it in one direction it can be picked Similarly many possibilities are seen by keen eyes while solving a mathematical problem The reconstruction approach applied in this book is like the third possibility of holding a fruit and turning it in one direction until the desired solution is obtained This book is an introduction to reconstruction concepts and their applications for solving some network optimization problems Networks are a mathematical abstraction of a given physical situation which are described by using nodes links directed or non directed and link weights defining some associated properties of that physical system Reconstruction ideas exploit the mathematical structure of a particular problem and find ways to reach the required solution It is hoped that these ideas will be explored for other mathematical structures The authors have developed many methods to find optimal solutions for these network related problems and they observed that various methods discussed in 8 chapters have a common thread of reconstruction which unites them and that aspect motivated authors to develop this book

Prussing, 2013-11-04 Want to know not just what makes rockets go up but how to do it optimally Optimal control theory has become such an important field in aerospace engineering that no graduate student or practicing engineer can afford to be without a working knowledge of it This is the

first book that begins from scratch to teach the reader the basic principles of the calculus of variations develop the necessary conditions step by step and introduce the elementary computational techniques of optimal control This book with problems and an online solution manual provides the graduate level reader with enough introductory knowledge so that he or she can not only read the literature and study the next level textbook but can also apply the theory to find optimal solutions in practice No more is needed than the usual background of an undergraduate engineering science or mathematics program namely calculus differential equations and numerical integration Although finding optimal solutions for these problems is a complex process involving the calculus of variations the authors carefully lay out step by step the most important theorems and concepts Numerous examples are worked to demonstrate how to apply the theories to everything from classical problems e g crossing a river in minimum time to engineering problems e g minimum fuel launch of a satellite Throughout the book use is made of the time optimal launch of a satellite into orbit as an important case study with detailed analysis of two examples launch from the Moon and launch from Earth For launching into the field of optimal solutions look no further

**Computer-Based Environmental Management** Ralf Seppelt, 2007-06-27 Here the author provides professionals in environmental research and management with the information they need with respect to computer modeling An understanding of the mathematical fundamentals and the choice of the optimal approach and corresponding software for their particular task Numerous illustrations flowcharts and graphs partly in color as well as worked examples help in comprehending complex mathematical tasks and their solutions without the use of confusing mathematical formalism Case studies from various fields of environmental research such as landscape ecology environmental assessment population ecology hydrology and agroecology facilitate the application of simulation models to the solution of real world problems Contains a detailed summary of currently available software tools and the application in spatially explicit simulation based on geographic information systems The worked examples and case studies cover a broad range of environmental systems and processes adopting such modern mathematical methodology as partial differential equations fuzzy logic hybrid Petri nets and optimum control theory The result is a unique presentation of applications for high standard modeling and simulation methodologies in the interdisciplinary fields of environmental research From the Foreword by Robert Costanza Gund Institute of Ecological Economics Burlington VT USA As a teacher of environmental modeling I ve been searching for many years for the perfect text to use courses My search has ended with the publication of Ralf Seppelt s book and I intend to use it as a core text in modeling courses     Algorithms, Graphs, and Computers Bellman, 1970-04-01 Algorithms Graphs and Computers     *The Thread of Discourse* Joseph Evans Grimes, 1975 No detailed description available for The Thread of Discourse     *The Thread of Discourse* Joseph E.
