Frank Pierce Foster,1908 U.S. Government Research Reports ,1959 Along the Path to Recovery: Supporting Student Learning Motivation, Engagement and Development in Post-Pandemic Higher Education Genshu Lu,Mei Tian,Hongbiao Yin ,Boliang Guo,2025-12-12

The COVID 19 pandemic has caused unprecedented disruptions in educational systems on a global scale. It is estimated that the learning trajectories of approximately 1.5 billion students have been adversely affected, with the most vulnerable segments of the student population having suffered the most. Currently, three years post-outbreak, educational institutions have reopened worldwide; however, higher education is still in recovery, grappling with the long-term impact of the prolonged closures. Managing the aftermath of the pandemic calls for the implementation of innovative teaching and learning practices. Such practices should be informed by an in-depth and critical reflection on the lessons that we have learned during this crisis, aimed at supporting and reinforcing students' learning and development. In an era marked by uncertainty and constant changes, it is crucial that our higher education sector remains resilient and adaptable, ensuring that students are equipped to learn, develop, and thrive in the future world. Recent decades have seen a significant increase in research investigating learning motivation and engagement within higher education, establishing these topics as central themes in academic inquiry. Learning motivation refers to individuals' willingness, inclination, and enthusiasm to invest time, energy, and effort in academic endeavors, facilitating learning success and achievement. Student engagement refers to the time and effort students devote to activities that are empirically linked to desired outcomes of college. Researchers have explored characteristics and determinants of learning motivation and engagement across various learning environments involving diverse student cohorts, differentiated by gender, academic disciplines, educational levels, and cultural backgrounds. Additionally, research has illuminated the influences of motivation and engagement on learning achievement, as evidenced by improved academic performance, gains in general abilities, and intellectual development. Building upon the insights gained from the above-mentioned conceptual and empirical literature, the current Research Topic seeks to explore the features of and associations among students' learning motivation, engagement, and development within the post-pandemic higher education contexts. This collection intends to bring together researchers, scholars, and higher education policy makers to share insights, methodologies, and practices that highlight the importance of supporting student motivation, engagement, and development as cornerstones for the recovery of higher education. The dialogue facilitated by this collection aspires to contribute to the sustainable development of higher education in the post-COVID era. We invite original empirical research and theoretical articles on a range of topics, which include but are not limited to the following areas: Measurement of students' learning motivation, engagement, and development; Features and influential factors of students' learning motivation, engagement, and development; Relationship between students' learning motivation, engagement, and development; Teaching
