Proceedings of the Second International Symposium on the Biology of the Sipuncula Michael J. Boyle, Gisele Y. Kawauchi, 2018 In June 1970 a diverse group of scientists attended the International Symposium on the Biology of the Sipuncula and Echiura at the Marine Biological Station in Kotor Yugoslavia Forty two years later in June 2012 an aspiring generation of like minded scientists convened the Second International Symposium on the Biology of the Sipuncula ISBS2 along the banks of the Fort Pierce Inlet to the Indian River Lagoon in Florida USA The primary objective of the second symposium was to collect the world's dedicated sipunculan biologists in one place for a long overdue face to face communication of past present and future research We met our objective This proceedings volume includes a brief summary of workshop discussions and field events and a compilation of selected research papers presented by an international group of sixteen scientists from twelve nations in attendance at the ISBS2 Herein we highlight molecular developmental morphological ecological and biogeographic diversity of adult and larval sipunculans And we introduce several of the outstanding research challenges associated with resolving sipunculan interrelationships establishing standard sets of taxonomic characters refining methods for identification of cryptic species reconstructing an evolutionary framework of developmental life history patterns and addressing implications of recent phylogenetic and phylogenomic hypotheses that have relocated the ancient radiation of unsegmented sipunculan body plans within the predominantly segmented Annelida Provided by publisher

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives
