The patient zero of a virus infects 47 people within the span of three days. If the graphical analysis of the virus's infectivity is an exponential function, then after nine days, how many people will be infected? Correct Answer: Say the number of infected is expressed as y

$$y = Pe^{(rt)}$$

where P is the initial amount ($P=1$)

t is the amount of time (at $P=1$, $t=3$)

r is the rate of change

$$47 = e^{(3r)}$$

$$[\ln(47)] / 3 = r$$

therefore, $y = e^{((\ln 47)/3)x}$

After 9 days ($x=9$), $y = e^{(3 \times \ln(47))}$

using the law of exponent $y = 47^3 = 103823$

Sisters of Heart and Snow Margaret Dilloway, 2015-04-07 The award winning author of *How to Be an American Housewife* returns with a poignant story of estranged sisters forced together by family tragedy who soon learn that sisterhood knows no limits Rachel and Drew Snow may be sisters but their lives have followed completely different paths

Married to a wonderful man and a mother to two strong minded teens Rachel hasn't returned to her childhood home since being kicked out by her strict father after an act of careless teenage rebellion. Drew, her younger sister, followed her passion for music but takes side jobs to make ends meet and longs for the stability that has always eluded her. Both sisters recall how close they were but the distance between them seems more than they can bridge. When their deferential Japanese mother Hikari is diagnosed with dementia and gives Rachel power of attorney, Rachel's domineering father Killian becomes enraged. In a rare moment of lucidity, Hikari asks Rachel for a book in her sewing room and Rachel enlists her sister's help in the search. The book, which tells the tale of real life female samurai Tomoe Gozen, an epic saga of love, loss, and conflict during twelfth century Japan, reveals truths about Drew and Rachel's relationship that resonate across the centuries, connecting them in ways that turn their differences into assets.

Voices from the Classroom David J. Flinders, 1989. Educational policy discussions typically exclude the teacher's voice and ignore constraints of time, energy, and resources that challenge teachers and hinder policy implementation. The case studies presented in this monograph attempt to restore the teacher's perspective. Rather than analyzing policy shortfalls stemming from teacher apathy or incompetence, the booklet studies three successful high school English teachers committed to their profession and to visions of best practice within diverse classroom contexts. A qualitative approach based on interviews, classroom observations, and examination of written documents was employed to construct the case studies. Each case study contains a description of the teacher's school day and interpretive sections examining work demands and teaching strategies. All three teachers worked at suburban comprehensive high schools with enrollments of about 1,500. Confronted with persistent demands of curriculum management, large classes, and time constraints, all teachers studied developed conservation and isolationist strategies to ensure their daily survival. Teachers' work environments resemble other street level bureaucracies like police stations and welfare offices, characterized by 1. inadequate resources, 2. ambiguous goals, 3. unclear performance evaluation criteria, and 4. nonvoluntary clients. Fortunately, the teachers did not process their students as they did their curricula but negotiated cooperative alliances with students and bent rules in their interest. Policymakers need to follow these teachers' example and seek alliances with teachers, develop supportive staff development programs, relinquish tight control over classroom methods, and revamp their stereotyped images of teachers. 22 references.
