Book of Mormon Video Church of Jesus Christ of Latter-day Saints, 1994      Book of Mormon Video Church of Jesus Christ of Latter-day Saints, 1994      **Music/Video** Gina Arnold, Daniel Cookney, Kirsty Fairclough, Michael Goddard, 2017-08-30 This book is a lively comprehensive and timely reader on the music video capitalising on cross disciplinary research expertise which represents a substantial academic engagement with the music video a mediated form and practice that still remains relatively under explored in a 21st century context The music video has remained suspended between two distinct poles On the one hand the music video as the visual sheen of late capitalism at the intersection of celebrity studies and postmodernism On the other hand the music video as art looking to a prehistory of avant garde film making while perpetually pushing forward the digital frontier with a taste for anarchy controversy and the integration of special effects into a form designed to be disseminated across digital platforms In this way the music video virally re engenders debates about high art and low culture This collection presents a comprehensive account of the music video from a contemporary 21st century perspective This entails revisiting key moments in the canonical history of the music video exploring its articulations of sexuality and gender examining its functioning as a form of artistic expression between music film and video art and following the music video s dissemination into the digital domain considering how digital media and social media have come to re invent the forms and functions of the music video well beyond the limits of music television

*Ensign*, 2004 *Machines for Making Gods* Jon Bialecki, 2022-03-01 The Mormon faith may seem so different from aspirations to transcend the human through technological means that it is hard to imagine how these two concerns could even exist alongside one another let alone serve together as the joint impetus for a social movement *Machines for Making Gods* investigates the tensions between science and religion through which an imaginative group of young Mormons and ex Mormons have found new ways of understanding the world The Mormon Transhumanist Association MTA believes that God intended humanity to achieve Mormonism s promise of theosis through imminent technological advances Drawing on a nineteenth century Mormon tradition of religious speculation to reimagine Mormon eschatological hopes as near future technological possibilities they envision such current and possible advances as cryonic preservation computer simulation and quantum archeology as paving the way for the resurrection of the dead the creation of worlds without end and promise of undergoing theosis of becoming a god Addressing the role of speculation in the anthropology of religion *Machines for Making Gods* undoes debates about secular transhumanism s relation to religion by highlighting the differences an explicitly religious transhumanism makes Charting the conflicts and resonances between secular transhumanism and Mormonism Bialecki shows how religious speculation has opened up imaginative horizons to give birth to new forms of Mormonism including a particular progressive branch of the faith and even such formations as queer polygamy The book also reveals how the MTA s speculative account of God and technology together has helped to forestall some of the social pressure that comes with apostasy in much of the Mormon Intermountain West A fascinating ethnography of a group with much to say about crucial junctures of modern culture *Machines for Making Gods* illustrates how the scientific imagination can be better understood when viewed through anthropological accounts of myth
