The conference was held in Pune India during October 7-8 2009. It was hosted by the Centre for Development of Advanced Computing India and jointly organized with Copenhagen Business School Denmark, Aarhus University Denmark and Indian Institute of Technology Guwahati India. The theme of HWID2009 was Usability in Social, Cultural and Organizational Contexts. The conference was held under the auspices of IFIP TC 13 on Human Computer Interaction 1 Technical Committee TC13 on Human Computer Interaction. The committees under IFIP include the Technical Committee TC13 on Human Computer Interaction within which the work of this volume has been conducted. TC13 on Human Computer Interaction has as its aim to encourage theoretical and empirical human science research to promote the design and evaluation of human oriented ICT. Within TC13 there are different working groups concerned with different aspects of human computer interaction. The flagship event of TC13 is the bi annual international conference called INTERACT at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

Authors were encouraged to submit papers about design sketches for interfaces for organizations of work etc that they themselves had worked on. During the conference they presented the lessons they had learnt from the design and evaluation process citing reasons for why the designs worked or why they did not work. Researchers, designers and analysts in this way confronted concrete design problems in complex work domains and used this unique opportunity to share their own design problems and solutions with

the community To successfully practice and do research within Human Work Interaction Design requires a high level of personal skill which the conference aimed at by confronting designers and work analysts and those whose research is both analysis and design They were asked to collaborate in small groups about analysis and solutions to a common design problem

,2005 A magazine for designers of interactive products *Proceedings* ,2004 Thoughtful Interaction Design Jonas Lowgren,Erik Stolterman,2007-01-26 The authors of Thoughtful Interaction Design go beyond the usual technical concerns of usability and usefulness to consider interaction design from a design perspective The shaping of digital artifacts is a design process that influences the form and functions of workplaces schools communication and culture the successful interaction designer must use both ethical and aesthetic judgment to create designs that are appropriate to a given environment This book is not a how to manual but a collection of tools for thought about interaction design Working with information technology called by the authors the material without qualities interaction designers create not a static object but a dynamic pattern of interactivity The design vision is closely linked to context and not simply focused on the technology The authors action oriented and context dependent design theory drawing on design theorist Donald Sch n's concept of the reflective practitioner helps designers deal with complex design challenges created by new technology and new knowledge Their approach based on a foundation of thoughtfulness that acknowledges the designer's responsibility not only for the functional qualities of the design product but for the ethical and aesthetic qualities as well fills the need for a theory of interaction design that can increase and nurture design knowledge From this perspective they address the fundamental question of what kind of knowledge an aspiring designer needs discussing the process of design the designer design methods and techniques the design product and its qualities and conditions for interaction design
