### Directions for Using this Guide

Book studies can be powerful tools for developing the teacher expertise necessary for improving performance and enhancing student learning through deliberate practice. What sets an effective book study apart from an ineffective one lies in both the initial planning of the book study itself and the utilization of the knowledge, skills and practices acquired.

- This guide is for groups of educators' intent on bringing meaningful change to their teaching, mentoring, and/or leadership practices. This guide will take the study group through the study of a professional text and into planning and implementing of high quality changes in practices.
- The desired size of a study group can range from 2 to 10 people but a suggested size is 3-5 educators who are able to reflect upon and adapt their practice as needed. Having an administrator in this type of learning community is not necessary but administrators' participating as one of the learners is a productive practice.
- A study group does not require a leader, per se, but having a Coordinator to send meeting reminders and organize meeting locations is helpful.
- Any of the members of the study group can choose a text, if an administrator or other stakeholder has not already recommended one. Study groups can also choose to coordinate with other study groups at other school sites and districts via the Florida School Leaders website.
- Determine if study on and implementation of concepts in this resource are aligned to a Master In-service Component in the district's master in-service plan, Issues in your School Improvement Plan, and/or the IPDP or deliberate practice growth targets of individual members of the study group. Where they are align your study to requirements in those processes.
- The study group should create and maintain a Group Journal to serve as an archive of the group's work over time. All members should contribute to and have access to the journal, although one person can be in charge of coordination.
- This can be done any number of ways:
  - on paper
  - in a file that can be group shared (Dropbox, Google Drive, school network)
  - blog format

Determining Project Requirements Hans Jonasson, 2016-04-19 Good requirements do not come from a tool or from a customer interview. They come from a repeatable set of processes that take a project from the early idea stage through to the creation of an agreed upon project and product scope between the customer and the developer. From enterprise analysis and planning requirements gathering to documentation.
