Ndzendze, David Monyae, 2023-10-19 This edited volume discusses infrastructural cooperation and industrial cooperation between China and several countries in Africa. In contributions by academics and practitioners alike, the book distills the conceptual implications of empirical and ethnographic findings and explores probable future developments in the Africa-China relationship. The chapters deal with numerous countries across the African continent, covering nearly all regions, showcasing the dynamics of China's relations with different countries while highlighting African agency over major infrastructure projects and industrial activity. Providing an in-depth look at the evolving economic cooperation across these two regions, this volume will appeal to researchers and students of African politics, international relations, area studies, and comparative politics. The book will be of relevance to policymakers in governments, international organizations, and non-governmental organizations involved in policy formulation, particularly regarding the Africa-China relationship.

**Overtake Countermeasures for Vehicles** Melvin L. Myers, 2022-01-17 This book describes the century-long emergence and battle to protect drivers and occupants of off-road and on-road vehicles from crash-related injuries from rollovers. Deaths and serious injuries have been associated with vehicle overturns that involve tractors, other motorized machinery, automobiles, and small vehicles. It took more than a century to attend to much of this epidemic of death and disabling injury that resulted from these overturns. This book argues that a key factor in this response was epidemiology that reported rollover-related deaths and engineering revisionism that moved responses from blaming the victim to rollbars to prevent the deaths.
