The International after 150 Years George Comninel, Marcello Musto, Victor Wallis, 2017-10-02 The International Workingmen's Association was the prototype of all organizations of the Labour movement and the 150th anniversary of its birth 1864 2014 offers an important opportunity to rediscover its history and learn from its legacy The International helped workers to grasp that the emancipation of labour could not be won in a single country but was a global objective It also spread an awareness in their ranks that they had to achieve the goal themselves through their own capacity for organization rather than by delegating it to some other force and that it was essential to overcome the capitalist system itself since improvements within it though necessary to pursue would not eliminate exploitation and social injustice This book reconsiders the main issues broached or advanced by the International such as labor rights critiques of capitalism and the search for international solidarity in light of present day concerns With the recent crisis of capitalism that has sharpened more than before the division between capital and labour the political legacy of the organization founded in London in 1864 has regained profound relevance and its lessons are today more timely than ever This book was published as a special issue of Socialism and Democracy

Africa has been one of the world's fastest growing regions over the past decade and by 2030 will be home to nearly 1.7 billion people and an estimated \$6.7 trillion worth of consumer and business spending. Increased political stability in recent years and improving regional integration are making market access easier and business expansion will generate jobs for women and youth who represent the vast majority of the population. Current economic growth and poverty alleviation efforts mean that more than 43 percent of the continent's people will reach middle or upper class status by 2030. *Unlocking Africa's Business Potential* examines business opportunities in the eight sectors with the highest potential returns on private investment: the same sectors that will foster economic growth and diversification, job creation and improved general welfare. These sectors include consumer markets, agriculture and agriprocessing, information and communication technology, manufacturing, oil and gas, tourism, banking and infrastructure and construction. The book's analysis of these sectors is based on case studies that identify specific opportunities for investment and growth along with long-term market projections to inform decision making. The book identifies potential risks to business and offers mitigation strategies. It also provides policymakers with solutions to attract new business investments including how to remove barriers to business and accelerate development of the private sector.
