**Investing in Enchantment** Michelle Janning, 2024-08-06 Should we keep the family cabin or list it on Airbnb U S second homes are formally classified as investment properties used primarily for financial gain or vacation homes primarily reserved for personal use but what have families actually been doing with them before during and after COVID 19 lockdowns Today s desire for authenticity and family connectedness has made family vacation homes a compelling site to examine how we think of labor and leisure whom we include as family members and neighbors and how all of this is represented both spatially and materially Framed as a magical place for family members to look back on nostalgically the family vacation home remains an enchanted and memory filled site that is artificially removed from the marketplace even if it is rented to others for their family vacations It is meant to be a magical escape from the challenges of work and family stress politics and social inequalities In reality the family vacation home requires labor has financial value as a piece of family wealth and the magic is not accessible to all In *Investing in Enchantment* Michelle Janning tells a new story about the cultural meanings and structural outcomes surrounding family vacation homes today

[Directory of Corporate Counsel, Spring 2024 Edition](#) , **Finding Reliable Information Online** Leslie F. Stebbins, 2015-09-16 We live in an information saturated environment and spend far too much time searching

surfing skimming contributing and organizing the information in our lives We spend too little time immersing ourselves in reliable high quality information We are often so buried in information and strapped for time that we grab information like it was fast food without bothering to evaluate its quality Finding Reliable Information Online Adventures of an Information Sleuth uses stories or information adventures to illustrate the best approaches to searching for information and to help us develop our aptitude for locating high quality resources in a rapidly changing digital environment that is becoming proficient at monopolizing our attention with useless or unreliable information This book is about taking charge of the search process and not handing over the reins to search engines like Google Bing or Yahoo to dictate what information we consume Each chapter focuses on a quest for different types of information while digging deeper into the complexities of finding credible places to look for information and ways to think about evaluating it As the Internet evolves and becomes more sophisticated our strategies for finding and evaluating information need to evolve as well The stories in this book range from investigating challenging research questions to exploring health issues and everyday life questions like finding a reliable restaurant or product review These chapters go beyond the simple and more mechanical checklist approach to evaluating information though these factors are also discussed

**Compensation** Beverly J. DeMarr,Vicki Fairbanks Taylor,Claudia J. Ferrante,2025-01-14 Compensation A Balanced Approach 1e takes an applied approach to covering compensation systems and practices by balancing theory and research with exercises and applications Each chapter

looks at compensation from both the employer and employee perspective giving students a more holistic understanding of the role total rewards play in an organization Authors Beverly J DeMarr Vicki Fairbanks Taylor and Claudia J Ferrante help students develop the ability to think critically and ethically about compensation decisions and their effects on both employers and employees Minnesota Law Review ,2016 Cairo Press Review ,1974-03 Railroad Age Gazette ,1894 **Vanity Fair** ,2014 **The Profitability of Airbnbs Relative to Long-term Rentals in Los Angeles** Richard Burdette Houghton (III),2020 With the introduction of Airbnb the short term rental market has been greatly expanding It is assumed that profit maximizing property owners would only choose to use a short term platform if expected net revenues from doing so exceeded the expected net revenues of renting to a long term tenant Information asymmetries in occupancy rates net nightly rental fees and other short term rental factors however might lead property owners to overestimate the profitability of short term rentals This study estimates the yearly revenues earned from 19 970 short term rentals in metro Los Angeles from March 2018 to February 2020 using data scraped from the Airbnb website and compares it to yearly revenues over the same time period for 4 443 comparable properties in the long term annual lease rental market It was found that a property listed on Airbnb is expected to generate 17 027 less per year than a comparable long term rentals on average This result is sensitive to assumptions about Airbnb occupancy rates but the gap remains even under the most optimistic occupancy assumptions This difference in revenues indicates that property owners may be over estimating the profitability of Airbnb rentals or that the annual costs of operating an Airbnb is lower than a long term rental **Vacation's Great in Washington State** Washington (State).
