Aging The Paradox Of Life Why We Age:

Aging: The Paradox of Life Robin Holliday, 2007-05-04 For centuries people have been puzzled by the inevitability of human aging. For most of the second half of the twentieth century aging remained a mystery or an unsolved biological problem. At the end of the 20th century a remarkable scientific discovery emerged. It was not a single discovery in the usual sense because it was based on a series of important interconnected insights over quite a long period of time. These insights made it possible for the very first time to understand the biological reasons for aging in animals and man. It can already be said however that the many observations and insights that explain aging will not be accepted as established knowledge for a long time. The field is still full of scientists and non scientists who are just happy to go on speculating about the mystery of aging. The aim of this book is to dispel ignorance by explaining in non technical language what are the reasons for aging and the myth of excessive prolongation of life.

The Need for Theory Simon Biggs, Jon Hendricks, Ariela

Lowenstein, 2020-11-25 The Need for Theory speaks to the burgeoning need for critical thinking in social gerontology. The editors have brought together some of the foremost contributors to theoretical advances in the field. This volume incorporates state of the art theorizing with a focus on selected topical areas facing gerontologists around the world. Using their keen insights into substantive issues the contributors examine personal and structural changes affecting individuals over the life course. Extolling the need for theory is not enough the contributors focus their insights on a panoply of substantive issues linking the personal with the political and with the structural parameters that shape the process of aging no matter where it occurs.

Religion and Aging Andrea Bieler, Matthias Stracke, Angelika Veddeler, 2017-11-01 This collection of essays explores the intersection of religious psychosocial economic and cultural issues in relation to the dramatic demographic shifts we are facing on a global scale. Theologians gerontologists anthropologists and practitioners reflect on the meaning of aging in diverse contexts such as Indonesia South Africa Tanzania Botswana Germany Mexico and Switzerland. Assuming that aging is an intricate process that encompasses enrichment and loss the gain of wisdom and the loss of memory and the expansion as well as the constraint of agency the essays analyze how these dynamics play out in different cultural contexts. Special attention is given to the role of religion in processes of aging. Religion und Altwerden. Interkulturelle und interdisziplinäre Erkundungen. Der Sammelband untersucht das Zusammenspiel religiöser psychosozialer konomischer und kultureller Aspekte in Bezug auf die dramatischen demographischen Veränderungen mit denen wir in globaler Perspektive konfrontiert sind. Wissenschaftler und Praktiker reflektieren aus theologischer gerontologischer sozialpsychologischer und anthropologischer Perspektive die Bedeutung von Alterungsprozessen in unterschiedlichen Kontexten z B in Indonesien, Sdafrika, Tansania, Botswana, Deutschland, Mexiko und der Schweiz. Ausgehend von Berlegungen die zeigen dass Alterungsprozesse komplex sind und sowohl Bereicherung und Verlust den Zugewinn an Weisheit und den Verlust von Erinnerungsfähigkeit sowie die Ausweitung als auch die Einschränkung von Handlungsfähigkeit beinhalten können wird.
