Kumar, 2021-08-21 Water Productivity and Food Security Global Trends and Regional Patterns Volume Three reviews the need for water productivity improvements in agriculture addressing three distinct questions pertaining to agricultural water productivity improvement in developing countries including what are the regions where water is a limiting factor for raising agricultural outputs and water productivity improvements what are the technological measures in irrigation that can raise agricultural water productivity and result in water saving at various scales and what opportunities exist in the developing economies of South Asia and Africa for raising water productivity and improving water economy at basin scale This book provides a framework to characterize river basins based on water availability water supplies water uses and water demands to ascertain the need and measures available for improving crop water productivity that would be effective at various scales i.e plant level plot level irrigation system level and basin level This is an essential reference for anyone interested in water management and agriculture Presents clear explanations of the physical and technical measures that can be adopted to improve productivity of water in agricultural production under different basin conditions Offers physical strategies for improving water productivity in agriculture in different agroecological regions along with the institutional and policy measures that affect them Includes methodologies for assessing the food security challenges of individual nations using empirical analysis and global datasets

### **Social Capital and Local Water Management in Egypt** Dalia M.

Gouda, 2016-11-02 From the 1980s onward billions of dollars were poured into irrigation improvement programs in Egypt These aimed at improving local Nile water management through the introduction of more water efficient technology and by placing management of the improved systems in the hands of local water user associations The central premise of most of these programs was that the functioning of such associations could rely on the revival of traditional forms of social capital social networks norms and trust for their success Social Capital and Local Water Management in Egypt shows how the far reaching social changes wrought at the village level in Egypt through the twentieth century rendered such a premise implausible at best and invalid at worst Dalia Gouda examines networks of social relationships and their impact on the exercise of social control and the formation of collective action at the local level and their change over time in four villages in the Delta and Fayoum governorates Outlining three time frames pre 1952 1952 73 and 1973 to the present and moving between multiple actors farmers government officials and donor agencies Gouda shows how institutional and technological

changes during each period and the social changes that coincided with them yielded mixed successes for the water user associations in respect of water management Social Capital and Local Water Management in Egypt is essential reading for anyone working in the field of community based natural resource management in Egypt including policymakers and practitioners donor agencies and civil society organizations as well as anthropologists and sociologists

**On-farm Water Management** Dean F. Peterson,1974 Drip Irrigation for Agriculture Jean-Philippe Venot,Marcel Kuper,Margreet Zwarteeven,2017-07-06 Initially associated with hi tech irrigated agriculture drip irrigation is now being used by a much wider range of farmers in emerging and developing countries This book documents the enthusiasm spread and use of drip irrigation systems by smallholders but also some disappointments and disillusion faced in the global South It explores and explains under which conditions it works for whom and with what effects The book deals with drip irrigation behind the scenes showcasing what largely remain untold stories Most research on drip irrigation use plot level studies to demonstrate the technology's ability to save water or improve efficiencies and use a narrow and rather prescriptive engineering or economic language They tend to be grounded in a firm belief in the technology and focus on the identification of ways to improve or better realize its potential The technology also figures prominently in poverty alleviation or agricultural modernization narratives figuring as a tool to help smallholders become more innovative entrepreneurial and business minded Instead of focusing on its potential this book looks at drip irrigation in use making sense of what it does from the perspectives of the farmers who use it and of the development workers and agencies policymakers private companies local craftsmen engineers extension agents or researchers who engage with it for a diversity of reasons and to realize a multiplicity of objectives While anchored in a sound engineering understanding of the design and operating principles of the technology the book extends the analysis beyond engineering and hydraulics to understand drip irrigation as a sociotechnical phenomenon that not only changes the way water is supplied to crops but also transforms agricultural farming systems and even how society is organized The book provides field evidence from a diversity of interdisciplinary case studies in sub Saharan Africa the Mediterranean Latin America and South Asia thus revealing some of the untold stories of drip irrigation
