

1. THE FOLLOWING SHOULD ALWAYS BE OBSERVED FOR SAFETY

- Be sure to read THE FOLLOWING SHOULD ALWAYS BE OBSERVED FOR SAFETY before installing the air conditioner.
- We have to observe the cautions specified because they include important items related to safety.
- The cautions and messages are as follows.

WARNING: Could lead to death, serious injury etc.

CAUTION: Could lead to minor injury in particular small amounts when operated incorrectly.

After reading this manual, be sure to keep it together with the OPERATING INSTRUCTIONS in a handy place on the customer's site.

WARNING

- Do not install the unit by yourself yourself. Unskilled installation could cause injury due to the electric shock, the short-circuit, the overheating or damage of unit. Consult the dealer before you purchase the unit or operate it.
- Install the unit securely in a place which can bear the weight of the unit. When installed in an insufficient strength, the unit could fall causing injury.
- Use the specified tools to connect the indoor and outdoor units securely and attach the wires firmly to the terminal block connecting screws so the stress of the wires is not applied to the terminals. Incorrect connecting will bring about noise.
- Do not use unnecessary connection of the power cord or the extension cord and do not connect many devices to one AC outlet. It may cause a fire or an electric shock due to incorrect connection, insulation insulation, exceeding the permissible current, etc.
- Check that the refrigerant gas does not leak after installation has completed. Refrigerant gas is very volatile, and causes the explosion of fire or even human fatalities. Do not touch refrigerant gas.
- Do not install the unit in a place where an inflammable gas leak. If you touch any substances in the area surrounding the unit, it could cause an explosion.
- Install a base unit with a torque wrench as specified in this manual. When installed too light, it cannot hold very well due to a long period and causes a damage of refrigerant.
- Perform electric work according to the installation diagram and be sure to use an earthing connection. If the capacity of the power source is insufficient or there is insufficient electrical work, it could result in a fire or an electric shock.
- Attach the electrical cover to the indoor unit and the service panel to the indoor unit securely. If it is not attached securely to the indoor unit and/or the service panel to the indoor unit, it could result in a fire or an electric shock due to short circuit.
- Do not use the non-specified or specified parts for the installation work. The use of inferior parts could cause an injury due to a fire or an electric shock, the unit failing, leakage of refrigerant, etc.
- Be sure to cut off the main power in case of pulling up the indoor unit or removing the indoor unit for wiring work. It could cause an electric shock.
- The refrigerant shall be handled in accordance with national piping regulations.
- When installing or relocating the unit, make sure that no substance other than the specified refrigerant can leak into the refrigerant circuit. Any presence of foreign substances such as oil can cause abnormal pressure rise or an explosion.

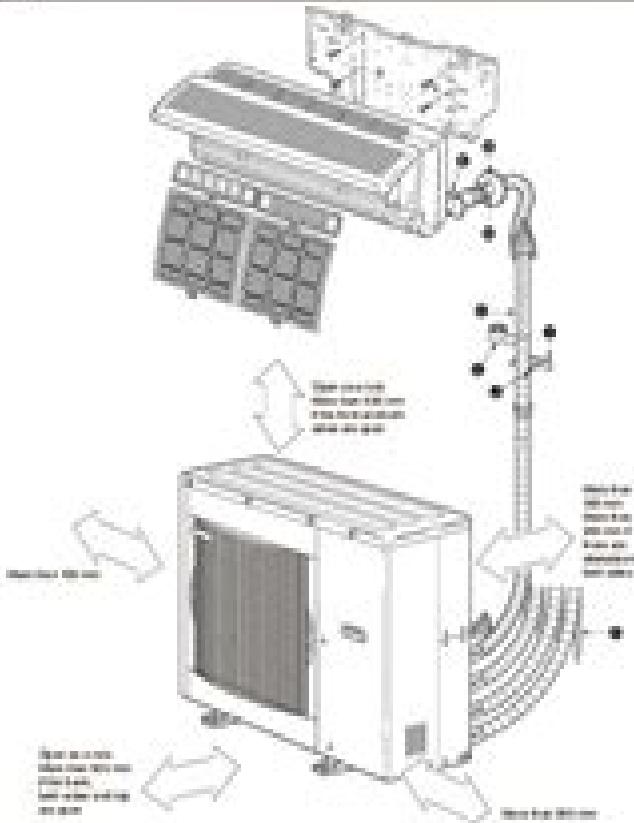

CAUTION

- Perform air piping. Do not connect the unit with a pipe which is too long, tight-fitting or too complex with many connections because such causes an electric shock.
- Do not install the unit in a place where an inflammable gas leak. If you touch any substances in the area surrounding the unit, it could cause an explosion.
- Install a base unit with a torque wrench as specified in this manual. When installed too light, it cannot hold very well due to a long period and causes a damage of refrigerant.
- Install an earthing terminal (terminal for the installation plate (there is 1 terminal), the earth leakage detector or telephone), if there cause an electric shock.
- Perform the discharging work securely according to the installation manual. If there is a leak in the connection tube, water could drip from the unit and insulation protection may be cut and damaged.

2. INSTALLATION DIAGRAM & ACCESSORIES

Before Installation

This installation manual is only for the outdoor unit installation. In installing the indoor units, refer to the installation manual attached to each indoor unit. Any structural alterations necessary for the installation must comply with the local building code regulations.
