Determination And Effectiveness Of Wwii Strategic Bombing Strategy Colonel T. Tracey Goetz, 2014-08-15 With the collapse of France in 1940 American US and British UK leadership became keenly aware that the continued security of their nations required the defeat of the Axis powers particularly Germany The Allies chose a strategy utilizing a combination of various military actions most notably a combined bomber offensive CBO The CBO would be carried out through a combination of US daylight precision and UK night area bombing The purpose of this paper is to show why the Allies chose this strategy and evaluate its success To accomplish this task the paper will first describe the events that brought about the conflict and the strategy Crowl s Questions are used as a framework to analyze the factors that influence strategy development and adoption and will illustrate why Allied leaders chose this path This is followed by a detailed description of the campaign The principles of war mass objective offensive maneuver surprise security simplicity unity of command and economy of force are accepted as proven methods for employing forces in combat and are used to evaluate the CBO s effectiveness The paper closes with a summary of the findings and doctrinal implications The paper will show the Allies adopted US daylight precision and UK night area bombing based on leadership s belief that it could most effectively reduce Germany s means of war and hasten its earliest possible defeat The Allies successfully achieved this objective primarily through adherence to the principles of mass objective offensive and maneuver Basic Principles of Air Warfare ,1927

L. DiNardo, 2005 It seemed that whenever Mussolini acted on his own it was bad news for Hitler Indeed the Fuhrer s relations with his Axis partners were fraught with an almost total lack of coordination Compared to the Allies the coalition was hardly an alliance at all Focusing on Germany s military relations with Italy Romania Hungary and Finland Richard DiNardo unearths a wealth of information that reveals how the Axis coalition largely undermined Hitler s objectives from the Eastern Front to the Balkans Mediterranean and North Africa DiNardo argues that the Axis military alliance was doomed from the beginning by a lack of common war aims the absence of a unified command structure and each nation s fundamental mistrust of the others Germany was disinclined to make the kinds of compromises that successful wartime partnerships demanded and because Hitler insisted on separate pacts with each nation Italy and Finland often found themselves conducting counterproductive parallel wars on their own DiNardo s detailed assessments of ground naval and air operations reveal precisely why the Axis allies were so dysfunctional as a collective force sometimes for seemingly mundane but vital reasons a shortage of

interpreters for example His analysis covers coalition warfare at every level demonstrating that some military services were better at working with their allies than others while also pointing to rare successes such as Rommel s effective coordination with Italian forces in North Africa In the end while some individual Axis units fought with distinction if not on a par with the vaunted Wehrmacht and helped Germany achieve some of its military aims the coalition s overall military performance was riddled with disappointments Breaking new ground DiNardo s work enlarges our understanding of Germany s defeat while at the same time offering a timely reminder of the challenges presented by coalition warfare **Author and Journalist** ,1928
