*The Benefits of Nature-Based Solutions to Psychological Health* Giovanni Sanesi, Giuseppina Spano, Payam Dadvand, 2021-03-10    **Course in Nature Study** Detroit Public Schools, 1922    The Politics of Nature and Science in Southern Africa Maano Ramutsindela, Giorgio Miescher, 2016-08-12 This book brings together recent and ongoing empirical studies to examine two relational kinds of politics namely the politics of nature i.e. how nature conservation projects are sites on which power relations play out and the politics of the scientific study of nature. These are discussed in their historical and present contexts and at specific sites on which particular human-environment relations are forged or contested. This spatio-temporal juxtaposition is lacking in current research on political ecology while the politics of science appears marginal to critical scholarship on social nature. Specifically the book examines power relations in nature related activities, demonstrates conditions under which nature and science are politicised and also accounts for political interests and struggles over nature in its various forms. The ecological, socio-political and economic dimensions of nature cannot be ignored when dealing with present day environmental issues. Nature conservation regulations are concerned with the management of flora and fauna as much as with humans. Various chapters in the book pay attention to the ways in which nature, science and politics are interrelated and also co-constitutive of each other. They highlight that power relations are naturalised through science and science related institutions and projects such as museums, botanical gardens, wetlands, parks and nature reserves.    *A Leader's Guide to Nature-oriented Activities* Betty Van der Smissen, Oswald H. McComas, 2006-04-11 The Nature of Science in Science Education is the first book to blend a justification for the inclusion of the history and philosophy of science in science teaching with methods by which this vital content can be shared with a variety of learners. It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain. This book is relevant to science methods instructors, science education graduate students and science teachers.    Nature Sir Norman Lockyer, 1895    Nature, 1895    Nature Magazine, 1927 An illustrated monthly with popular articles about nature.    **Arts and Activities**, 1983    Connecticut Schools, 1927    **Hobbies; the Magazine of the Buffalo Museum of Science**, 1930    The Nature-study Review, 1923    The Nature Almanac Arthur Newton Pack, 1930    Canadian Nature, 1949    Journal of Educational Method, 1928    **Science on the March**, 1930    *Annual Report of the Board of Regents of the Smithsonian Institution* Smithsonian Institution.
