## **Atlantis The Lost Continent Finally Found:**

Atlantis Arysio Santos,2005-06 Thousands of books have already been written on Atlantis since its reality was first disclosed by the great philosopher Plato some two and a half millennia ago Hence one may well wonder whether a new book on the subject is really needed Can anything new actually be said about Atlantis The answer is a most categorical yes After all the riddle of Atlantis has never been satisfactorily solved so far The present book is an attempt by a reputed scientist to scientifically compare and refute perhaps for the first time ever the various existing theories on Atlantis location and reality The author also expounds his own theory which definitively locates Atlantis in Indonesia In his research Prof Santos marries the most recent results and techniques of Modern Science to the sacred and folk lore of all the peoples of the world knitting humanity together in a solution to the riddle of Atlantis that neatly ties together the vast scientific and traditional evidence which was always there but never before seen by other researchers The reader whether a scientist with an open mind or a lay person is led to conclude that Plato could well have been telling the truth after all since the information provided by the great philosopher is so uncannily confirmed by the recent scientific finds of all sorts

**From the First Rising Sun** Charla Jean Morris,2011-08-10 While in medical school which I did not have the privilege of completing once a week we had a small group discussion class called Focus On Problems Each group had a leader a member of the medical school staff or someone closely associated with the school usually an MD or Ph D Our group leader was Dean of the Medical School H David Wilson MD One class period focused on working with patients of different ethnic backgrounds Dr Wilson asked me what were some of the traditions of my tribe in regard to medicine that would be helpful for a doctor to know My reply was that I had been raised like a white that I had grown up learning about various herbal and natural remedies but that I knew nothing about the specific medical traditions ceremonial or secular of my people I had always longed to know of the traditions of my people before that but circumstances of my family history had not allowed it That question in the Focus On Problems class caused that longing to intensify into a sharp pang of longing that would not be satisfied until many years later While in the first two years of medical school as a nontraditional student I was in an environment that encouraged the development of the knowledge of Native American traditions We had Native American speakers that came and elaborated on Native American traditions One area that was lacking was tribal histories but what academics label prehistory I commented to her that when white man came they did all they could to destroy our social and religious fabric so the old traditions were not passed down to most of the remaining members of the tribes Now we know nothing of our old history There is nothing left The white side of my family history is easy to know but not my Cherokee and Choctaw side She replied by saying that yes many of our peoples have lost their old traditions and it is sad Sundaland: Tracing The Cradle of Civilizations Dhani Irwanto,2019-02-22 Sundaland is a bio geographical region of Southeastern Asia

which encompasses the Sunda Shelf the part of the Asian continental shelf that was exposed during the Last Ice Age It included the Malay Peninsula on the Asian mainland as well as the large islands of Kalimantan Java and Sumatra and their surrounding islands Sundaland is in the tropics surrounded by oceans and within the Ring of Fire Benefitting from the heavy precipitation volcanic deposits in Sundaland develop into some of the richest forestry and agricultural lands and developed into some of the richest fauna on Earth The vast majority of scholars accept that every living human being is descended from a small group in Africa who then dispersed into the wider world Archaeological and fossil evidence support an early migration of modern humans left Africa and followed the coastlines of Africa Arabia India and Sundaland After migrating from the semi deserted savannas of Africa man first found a place in Sundaland where food was abundant and it was there that they left hunter gatherer culture and invented farming agriculture trading and civilization which made humanity first flourished All this took place during the Last Glacial period The sea levels continued to rise gradually to peak levels about 5 500 years ago causing land loss on tropical coasts with flat continental shelves Cracks in the earth's crust as the weight of the ice shifted to the seas set off catastrophic events compounded by earthquakes volcano eruptions super waves and floods drowned the coastal cultures and all the flat continental shelves of Southeast Asia and wiped out many populations As the sea rolled in there was a mass migration from the sinking continent Genetic studies show that there has been a sharp decline in the population of the world and population turnovers from Southeast East and South Asia to Europe Near East and the Caucasus beginning at the end of the Younger Dryas period The Younger Dryas disasters are also documented as legends myths or tales in almost every region on Earth observable with tremendous similarities They are common across a wide range of cultures extending back into Bronze Age and Neolithic prehistory The overwhelming consistency among legends and myths of flood and the repopulation of man from a flood hero similar to the Noah Flood are found in distant parts of the Earth The myths similar to the Garden of Eden Paradise or Divine Land echo among the populations around the world Memories of their origin are documented in their legends such as the stories of Atlantis Neser Ser Land of Punt Land of Ophir Kumari Kandam Kangdez and Taprobana Pyramids spread in many parts of the world and emerged separately from one another by oceans who supposedly never discovered each other's existence Those indicate that they were derived from a common origin Further scholastic belief by etymologists and linguists are positive that all world languages sprang from a common source

*Sunken Realms* Karen Mutton, 2011-03-09 Australian researcher Karen Mutton has compiled the world's most extensive list of sunken cities and megalithic underwater sites currently known around the world She begins by discussing some of the causes for sunken ruins super floods volcanoes earthquakes at the end of the last great flood plate tectonics and other theories She then discusses Plato's Atlantis and the various areas of the Mediterranean and Atlantic that have been proposed as the location From there she launches into a worldwide cataloging of underwater ruins by region She begins with the many underwater cities in the Mediterranean and then moves into northern Europe and the North Atlantic She continues with

chapters on the Caribbean and then moves through the extensive sites in the Pacific and Indian Oceans The final chapters are on ruins and structures in lakes and inland seas plus a brief look at modern and medieval sunken ruins Comes with plenty of maps illustrations and rare photos Places covered in this book include Tartessos Cadiz Morocco Alexandria The Bay of Naples Libya Phoenician and Egyptian sites Roman era sites Yarmuta Lebanon Cyprus Malta Thule Celtic Realms Lyonesse Ys and Hy Brasil Carnac Brittany Isle of Wight Canary and Azore Islands Bahamas Cuba Bermuda Mexico Peru Micronesia California Japan Indian Ocean Sri Lanka Land Bridge India Sumer Lake Titicaca and inland lakes in Scotland Russia Iran China Wisconsin Florida and more A unique and fascinating book **Pseudoscience** Brian Regal,2009-10-15 More than just a collection of factual entries this rich resource explores the difference between scientific and pseudoscientific pursuits in a way that spurs readers to ask questions and formulate answers What makes science science How do we tell which assertions beliefs and methods are scientifically sound and which are not Brian Regal s authoritative entertaining new reference **Pseudoscience A Critical Encyclopedia** gets at the heart of these questions by helping readers understand how the scientific method works how to critically analyze all kinds of evidence and how to sort through long running myths and current pseudoscience controversies Ranging from the dawn of history to the present and across world cultures **Pseudoscience** uses a field of endless fascination as a means of driving home the importance of solid scientific reasoning The encyclopedia spans the full spectrum of scientific and nonscientific pursuits from chemistry biology psychology and medicine to eugenics religion cryptozoology the occult and paranormal activities Specific entries focus on general concepts of science the lives of individuals and claims of abilities Throughout these entries go beyond simply stating facts by constantly engaging readers in a discussion about the very nature of true scientific discovery **LEMURIA IS INDONESIA** Santo Saba Piliang, WE ARE NOT FROM INDIA TO ARAB BECAUSE OF BOTH FROM HERE Question When and who did the Indian missionaries come to the archipelago to go to remote corners of the country so that all the original teachings of the archipelago thousands of sites as well as the Pre Islamic kingdom were called from India Pay attention to The origins of Religion in India began with the entry of the Aryan Cakya Saka Nation which brought enormous changes in the life order of Indian society from 3 102 BC to 1 300 BC That the Aryans were not the first inhabitants of India and the Harappan Dravidian civilization existed long before their arrival This means that the Aryan or Vedic culture was not the sole source of early civilization in India that the source came from somewhere else This change occurred because the Aryan people integrated their culture with the native Indian nation Dravida and then this integration gave birth to 3 Indian religions the Aryan Nation after it started writing the Vedic scriptures this holy book is written in 4 parts such as Reg Veda Sama Veda Yayur Veda and Atharwa Veda So Saka is the name of a nation who came to India and expanded to migrate to Central Asia Eastern Europe and North Anatolia in the period after the Mahabharata war 3162 BC around 3100 3000 BC Europeans called the Saka with Scythian this is what is meant by Aryan the ancestors of the Indonesian nation who colored 3 4 of the earth s face as well as the land of India The

**Saving Mother Ocean** Steve Andrews,2021-11-26 We ve all seen the news of dead and dying whales and the alarming amounts of plastic pollution washing up on beaches or floating on the tides The oceans are in very great danger for many reasons and it is not just plastic waste which is bad enough Overfishing acidification coral bleaching nuclear waste seabed mining military testing and climate change are taking a very heavy toll on marine creatures of all types from tiny plankton to the massive whales The eponymous Dead Zones are aptly named Many marine creatures are in danger of extinction Life on this planet depends on healthy oceans We depend on healthy oceans This book takes a look at the threats to marine life and what is being done to save the seas It is a call to action to save Mother Ocean The author explains how he became personally motivated to do what he could As a singer and songwriter he wrote songs and came up with the idea for Ocean Aid concerts Now he has written the book you are holding He hopes to inspire you to think about what you can do We all need to help save the seas

**Pebbles on the Beach** M. Jankiraman Ph.D.,2020-10-28 This planet abounds in myths and legends prevalent in various cultures More often than not these are based on a kernel of truth The facts get grossly exaggerated through the ages much like a fishing tale Pebbles on the Beach is a concise examination of many of these There are adequate references given at the end of each chapter in case the reader wishes to follow up on these Some of the stories examined are pertaining to the year 2012 the biblical end of times as well as the story of Atlantis the Ark of the Covenant and an examination of the secrets of the Great Pyramid at Giza in Egypt amongst others This book also includes an investigation of the story of Moses especially the identity of the Pharaoh responsible for the Exodus This is a result of many years of patient study of such topics by the author and is presented for the first time in the form of one book for easy reading One is reminded of the famous quote attributed to Sir Isaac Newton wherein he said that I seem to have been only like a boy playing on the sea shore and diverting myself in now and then finding a smoother pebble or a prettier shell than ordinary whilst the great ocean of truth lay all undiscovered before me

**TV in the USA** Vincent LoBrutto,2018-01-04 This three volume set is a valuable resource for researching the history of American television An

encyclopedic range of information documents how television forever changed the face of media and continues to be a powerful influence on society. What are the reasons behind enduring popularity of television genres such as police crime dramas, soap operas, sitcoms and reality TV? What impact has television had on the culture and morality of American life? Does television largely emulate and reflect real life and society or vice versa? How does television's influence differ from that of other media such as newspapers and magazines, radio, movies and the Internet? These are just a few of the questions explored in the three volume encyclopedia *TV in the USA: A History of Icons, Idols and Ideas*. This expansive set covers television from 1950 to the present day, addressing shows of all genres, well known programs and short lived series alike, broadcast on the traditional and cable networks. All three volumes lead off with a keynote essay regarding the technical and historical features of the decade's covered. Each entry on a specific show investigates the narrative themes and history of the program, provides comprehensive information about when the show started and ended and why, and identifies the star players, directors, producers and other key members of the crew of each television production. The set also features essays that explore how a particular program or type of show has influenced or reflected American society, and it includes numerous sidebars packed with interesting data related information and additional insights into the subject matter.

*The Golden Sea* Joseph E. Brown, 1974    **Indonesia, an Official Handbook**, 2010    **Spirits and Ships** Andrea Acri, R. Blench, Alexandra Landmann, 2017 This volume seeks to foreground a borderless history and geography of South, Southeast and East Asian littoral zones that would be maritime focused and thereby explore the ancient connections and dynamics of interaction that favoured the encounters among the cultures found throughout the region stretching from the Indian Ocean littorals to the Western Pacific from the early historical period to the present. Transcending the artificial boundaries of macro regions and nation states and trying to bridge the arbitrary divide between inherently cosmopolitan high cultures e.g. Sanskritic Sinitic or Islamicate and local or indigenous cultures this multidisciplinary volume explores the metaphor of Monsoon Asia as a vast geo environmental area inhabited by speakers of numerous language phyla which for millennia has formed an integrated system of littorals where crops, goods, ideas, cosmologies and ritual practices circulated on the sea routes governed by the seasonal monsoon winds. The collective body of work presented in the volume describes Monsoon Asia as an ideal theatre for circulatory dynamics of cultural transfer, interaction, acceptance, selection and avoidance and argues that despite the rich ethnic, linguistic and sociocultural diversity a shared pattern of values, norms and cultural models is discernible throughout the region.
