

Operating and maintenance information for on-off valves

directional, flow, and pressure control

safety valves with spool position monitor, conforming to Machine Directive 2006/42/EC

This operating and maintenance information applies to Atos on-off directional, flow, pressure control valves and safety valves with spool position monitor. It is intended to provide useful guidelines to avoid risks when the valves are installed in the hydraulic system.

It contains important information on the safe and correct installation, commissioning, operation, transport, and maintenance of the products.

The prescriptions included in this document must be strictly observed to avoid damages and injury.

The respect of the operating and maintenance information grants an increased working life, trouble-free operation and thus reduced repairing costs.

1 SYMBOL CONVENTIONS

Following symbols are used in this documentation to evidence particular risks to be carefully avoided.

In the following are listed the symbol conventions with their meaning. In case of non-compliance with this operating and maintenance information:

	WARNING	Death or serious injury could occur	This classifies the Atos 2505.0 / ISO 13854
	CAUTION	Minor or moderate injury could occur	
NOTICE		Property damage could occur	
		Notes relevant to safety valves	
		Information to be observed	

2 GENERAL NOTES

This document is relevant to the installation, use and maintenance of on-off directional, flow and pressure control valves. It is intended for machine manufacturers, assemblers and system end-users.

WARNING

Personal injury and property damage may be caused by incorrect use of the products!

The products have been designed for use in industrial environments and may only be used in this appropriate way.

Before using Atos valves, the following requirements must be met to ensure the appropriate use of the products:

- personnel who uses Atos valves must first read and understand the operating and maintenance information, particularly the Safety Notes in section **5**
- the products must remain in their original state, no modifications are permitted
- damaged or faulty valves must not be installed or put into operation
- make sure that the products have been installed as described in section **5**

2.1 Warranty

The expiration of warranty results from the following operations:

- incorrect assembly and commissioning
- improper use, see 5.2
- improper handling and storage, see 6.4
- modification of the original condition

3 CERTIFICATION

Atos safety valves with spool / spool position monitor are designed to accomplish a safety function intended to reduce the risk in process control systems.

The valves are **TUV certified** in compliance with Machine Directive 2006/42/EC, Annex IX – EC type-examination-certificate for safety components (Cat. Annex IV – 21) Norms EN ISO 13849-1 and EN ISO 13849-2.

They can be used in applications up to Category 1, PL c, in high demand mode.

The spool / spool position monitor is factory set in conformity to the relevant norms, and their regulation is properly stated.

Any tampering of the setting invalidates the certification.

Atos Maintenance Manual:

Technical Manual Naval Air Systems Command, 2018-10-19 Technical Order TO 1 1A 1 is one of a series of manuals prepared to assist personnel engaged in the general maintenance and repair of military aircraft. This manual covers general aircraft structural repair. This is a Joint Service manual and some information may be directed at one branch of the service and not the other. Wherever the text of the manual refers to Air Force technical orders for supportive information, refer to the comparable Navy documents. See Table 1. The satisfactory performance of aircraft requires continuous attention to maintenance and repair to maintain aircraft structural integrity. Improper maintenance and repair techniques can pose an immediate and potential danger. The reliability of aircraft depends on the quality of the design as well as the workmanship used in making the repairs. It is important that maintenance and repair operations be made according to the best available techniques to eliminate or at least minimize possible failures.

The Federal Aviation Administration's Oversight of Outsourced Air Carrier Maintenance United States. Congress. House. Committee on Transportation and Infrastructure. Subcommittee on Aviation, 2007. [Air Carriers' Outsourcing of Aircraft Maintenance](#) David A. Dobbs, 2009-03. This is a review of the FAA's oversight of air carriers' outsourced aircraft maintenance. As of July 14, 2008, there were 4,159 domestic and 709 foreign repair stations certificated by FAA to perform maintenance on U.S. aircraft. When an air carrier uses an FAA certificated repair station to repair its aircraft or parts, the repair station's organization becomes an extension of the air carrier's maintenance organization. This report 1 identifies the type and quantity of maintenance performed by external repair stations and 2 determines whether FAA is effectively monitoring air carriers' oversight of external repair stations' work and verifying that safety requirements are met. Critical Lapses in Federal Aviation Administration's Safety Oversight of Airlines: Abuses of Regulatory & Partnership Programs James Oberstar, 2009-12. Hearing to review the results of an oversight investigation. Two FAA Aviation Safety Inspectors have provided evidence raising serious questions of conduct violating the Federal Aviation Regulations (FARs) in the inspection and maintenance program of Southwest Airlines (SWA). FAA employees have engaged in conduct which constitutes a violation of Federal law, rule or regulation, gross mismanagement, an abuse of authority, and a substantial damage to public safety. The Maintenance Inspector for SWA knowingly allowed the airline to operate in March 2007 and possibly beyond and well after the inspection deadlines on a mandatory FAA Airworthiness Directive. There may be a pattern of regulatory abuse and that these regulatory lapses may be more widespread.
