

**CAUTION (Continued)**

(continued):

- A. Adjust the heating or cooling system to force outside air into the vehicle as follows:
  1. On vehicles not equipped with air conditioning, set the heater to medium or high speed.
  2. On vehicles equipped with air conditioning, set the heater to intermediate or high speed and the right-hand control lever to any position except "MAX - A/C".
- B. Keep the exhaust tailpipe area clear of snow and other material to help reduce the buildup of exhaust gases under the vehicle. This is particularly important when parked in snow or driving over snow.

Driving with tailgates, rear doors or rear windows open is not recommended. Under some conditions, exhaust gases may be drawn into the vehicle. If the tailgate, liftgate or rear window must remain open for some reason while moving, or if electrical wiring or other cable connections to a trailer must pass through the seal between the tailgate or window and the body, use these precautions:

- Close all windows.
- Adjust the heating or cooling system to force outside air into the vehicle as described above, but set the fan to high speed.
- On vehicles with outside air vents in or under the instrument panel, open the vents fully.

Take special care to prevent the chance of carbon monoxide exposure if a change is made to the vehicle (such as using a cover or canopy), or if a special body or other equipment is added to recreational or other usage. Also, some recreational vehicle gas powered appliances (such as generator lights, refrigerators, stoves and heaters) may give off carbon monoxide. Use these appliances only if there is enough ventilation, and follow the appliance manufacturer's instructions regarding the use of these items.

## **NEW VEHICLE "BREAK-IN" PERIOD**

**SEE "BREAK-IN" PERIOD**  
You can drive your new vehicle during the first few months without following a Bureau "break-in" schedule. However, to insure good use during the first few months, and economy of future use, add to the future performance and economy of your vehicle.

We recommend you limit your speed during the first 1000 kilometers to a maximum of 65 mph (100 km/h). After this initial period of any total distance spent, either limit to 80 mph (120 km/h) or drive at full throttle during stops and, if possible, avoid hard stops whenever possible. Use first 200 miles (320 kilometers) of driving to warm up.

Although drivers are more likely to drink and drive after a night of socializing, the risk of driving under the influence of alcohol is also high among drivers who have not been socializing.

1

If you plan to use your new vehicle for trailer towing, refer to the following:

## TRAILER TOWING

Since this vehicle is designed and intended to be used mainly as a load-carrying vehicle, towing a trailer will affect handling, durability and economy. Your safety and satisfaction depend upon proper use of correct equipment. Also, you should avoid overloads and other abusive use.

The maximum loaded trailer weight you can pull with your vehicle depends on your intended use and what special equipment has been installed on it.

Information on trailer towing ability, special equipment required, and optional equipment available should be obtained from your dealer. Ask for the "Recreational & Towing Guide" brochure. Or, write: Customer Assistance Department, Chevrolet Motor Division, P.O. Box 70417, Troy, Michigan 48057 (In Canada, write to General Motors of Canada Limited, Customer Assistance Department, Ottawa, Ontario K1J 5Z9.)

1000000000

When towing trailers, inflate the tires to the cold tire pressures (PSI) cold shown on the Certification Label (on the rear edge of the driver's door) or, if applicable, the "Tire Inflation Pressure" charts at the back of Section 5.

Remember that when a trailer is connected, the trailer tongue weight is part of the load being carried by the vehicle and, therefore, is included in the GVW of the vehicle.

WATER, IRON, AND

More frequent service is required when using your vehicle to pull a trailer. Refer to the Maintenance Schedule booklet for Automatic Transmission Fluid, Engine Oil and Rear Axle Lubricant change requirements for trailering.

Now and then, check that all master pitch bolts and nuts are tight. Also refer to the Maintenance Schedule booklet, and the index in this manual, for recommended routine bolts, coupling system care and take adjustment.

卷之三十一

Please let the new vehicle break-in information in this manual. Also, we recommend you drive your new vehicle for 500 miles (800 kilometers) before trailer towing. At the end of the 500-mile (800-kilometer) break-in period, avoid speeds over 50 mph (80 km/h) and full throttle starts during the first 100 miles (160 kilometers) of trailer towing.
