Apple Leopard Manual:

Mac OS X Leopard: The Missing Manual David Pogue, 2007-12-07 With Leopard Apple has unleashed the greatest version of Mac OS X yet and David Pogue is back with another meticulous Missing Manual to cover the operating system with a wealth of detail. The new Mac OS X 10.5, better known as Leopard, is faster than its predecessors but nothing's too fast for Pogue and this Missing Manual. It's just one of the reasons this is the most popular computer book of all time. Mac OS X The Missing Manual Leopard Edition is the authoritative book for Mac users of all technical levels and experience. If you're new to the Mac, this book gives you a crystal-clear, jargon-free introduction to the Dock, the Mac OS X folder structure, and the Mail application. There are also mini-manuals on iLife applications such as iMovie, iDVD, and iPhoto, and a tutorial for Safari, Mac's web browser. This Missing Manual is amusing and fun to read, but Pogue doesn't take his subject lightly. Which new Leopard features work well and which do not? What should you look for? What should you avoid? Mac OS X The Missing Manual Leopard Edition offers an objective and straightforward instruction for using Leopard's totally revamped Finder Spaces to group your windows and organize your Mac tasks; Quick Look to view files before you open them; The Time Machine, Leopard's new backup feature; Spotlight to search for and find anything in your Mac; Front Row, a new way to enjoy music, photos, and videos; Enhanced Parental Controls that come with Leopard; Quick tips for setting up and configuring your Mac to make it your own. There's something new on practically every page of this new edition, and David Pogue brings his celebrated wit and expertise to every one of them. Mac's brought a new cat to town, and Mac OS X The Missing Manual Leopard Edition is a great new way to tame it.

Switching to the Mac: The Missing Manual, Leopard Edition David Pogue, 2008-02-26 Is Windows giving you pause? Ready to make the leap to the Mac instead? There has never been a better time to switch from Windows to Mac, and this incomparable guide will help you make a smooth transition. New York Times columnist and Missing Manuals creator David Pogue gets you past three challenges: transferring your stuff, assembling Mac programs so you can do what you did with Windows, and learning your way around Mac OS X. Why is this such a good time to switch? Upgrading from one version of Windows to another used to be simple. But now there's Windows Vista, a veritable resource hog that forces you to relearn everything. Learning a Mac is not a piece of cake, but once you do, the rewards are oh so much better: No viruses, worms, or spyware. No questionable firewalls, inefficient permissions, or other strange features. Just a beautiful machine with a thoroughly reliable system. And if you're still using Windows XP, we've got you covered, too. If you're ready to take on Mac OS X Leopard, the latest edition of this bestselling guide tells you everything you need to know. Transferring your stuff, moving photos, MP3s, and Microsoft Office documents is the easy part. This book gets you through the tricky things: extracting your email address book, calendar, Web bookmarks, buddy list, desktop pictures, and MP3 files. Re-creating your software suite? Big name programs like Word, Photoshop, Firefox, Dreamweaver, and so on, are available in both Mac and Windows versions, but hundreds of other programs are available only for Windows. This guide identifies the Mac equivalents and explains how to

move your data to them Learning Leopard Once you ve moved into the Mac a final task awaits Learning your way around Fortunately you re in good hands with the author of Mac OS X The Missing Manual the 1 bestselling guide to the Macintosh Moving from Windows to a Mac successfully and painlessly is the one thing Apple does not deliver Switching to the Mac The Missing Manual Leopard Edition is your ticket to a new computing experience

Mac OS X Snow Leopard: The Missing Manual

David Pogue,2009-10-08 For a company that promised to put a pause on new features Apple sure has been busy there s barely a feature left untouched in Mac OS X 10.6 Snow Leopard There s more speed more polish more refinement but still no manual Fortunately David Pogue is back with the humor and expertise that have made this the 1 bestselling Mac book for eight years straight You get all the answers with jargon free introductions to Big ticket changes A 64 bit overhaul Faster everything A rewritten Finder Microsoft Exchange compatibility All new QuickTime Player If Apple wrote it this book covers it Snow Leopard Spots This book demystifies the hundreds of smaller enhancements too in all 50 programs that come with the Mac Safari Mail iChat Preview Time Machine Shortcuts This must be the tippiest trickiest Mac book ever written Undocumented surprises await on every page Power usage Security networking build your own Services file sharing with Windows even Mac OS X s Unix chassis this one witty expert guide makes it all crystal clear

Mac OS X Leopard

Mike Lee,Scott Meyers,2008-05-14 Good computer books make assumptions about the reader what they do and don t know when they pick up the book and what they want to know when they put it down For each reader this could be very different therefore a book that suits one person may not be the best for another Mac OS X Leopard Beyond the Manual makes some assumptions too ones that tend to differ from other Mac OS X books First of all we assume that you have used a computer in that past that you know how to use a mouse and you know the proper place to stick a DVD to get it to play in your computer We won t be showing you these things We will however demonstrate to our Mac converts how to right click on a trackpad with only one button Second we assume you know what you want to do with your computer We won t waste your time showing you specifically step by step how to order a pizza from Pizza Galaxy in Milwaukee Wisconsin with Safari though when you re done with this book we think you ll be able to do this just fine if such a place exists anyway Finally we assume that you are a reasonably intelligent person who realizes the value of such phrases as Give a man a fish you have fed him for today Teach a man to fish and you have fed him for a lifetime and can imagine how that might apply to a computer book If this sounds like you then we think you ll find this book rewarding Inside you will find everything you need to get up to speed with Mac OS X Leopard including Using the standard included Leopard applications including Mail Safari Preview and more Taking advantage of the Darwin subsystem in Leopard Learning all the ins and outs of the Finder and Leopards improved interface Administering your computer for yourself and for others Working with other computers and operating systems from you Mac Configuring the network to take full advantage of the powerful networking capabilities in Leopard Working with add on devices via USB Firewire and Bluetooth Effectively implementing data backup recovery and security Getting started with
