Program the Internet of Things with Swift for iOS Ahmed Bakir,Manny de la Torriente,Gheorghe Chesler,2015-12-30

Program the Internet of Things with Swift and iOS is a detailed tutorial that will teach you how to build apps using Apple's native APIs for the Internet of Things including the Apple Watch HomeKit and Apple Pay. This is the second book by Ahmed Bakir author of Beginning iOS Media App Development and his team at devAtelier LLC who have been involved in developing over 20 mobile projects. Written like a code review this book presents a detailed how and why for each topic explaining Apple specific design patterns as they come up and pulling lessons from other popular apps. To help you get up and running quickly each chapter is framed within a working project allowing you to use the sample code directly in your apps. The Internet of Things is not limited to Apple devices alone so this book also explains how to interface with popular third party hardware devices such as the Fitbit and Raspberry Pi and generic interfaces like Restful APIs and HTTPS. The Internet of Things is waiting to be a part of it.
